

## Family BOHOLDOYIDAE

Boholdoyidae was proposed by Kovalev *in* Kalugina & Kovalev (1985) for the single genus *Boholdoya* Kovalev. Later, Kovalev (1990) added the genus *Daiamyia* Kovalev to the family. The family is known only from three species from the Jurassic of Siberia.

Krivosheina & Zaitzev (1989) placed the family as the sister-group to the Eopleciidae in the Anisopodomorpha in their cladogram of superfamilies of Diptera.

### Genus BOHOLDOYA Kovalev

**BOHOLDOYA** Kovalev *in* Kalugina & Kovalev, 1985: 180. Type species: *Boholdoya alata* Kovalev, 1985, by original designation.

**alata** Kovalev *in* Kalugina & Kovalev, 1985: 182. PA: Russia (Siberia) (Lower/Middle Jurassic) [C].

**thoracica** Kovalev, 1990: 123. PA: Russia (Siberia) (Upper Jurassic) [C].

### Genus DAIAMYIA Kovalev

**DAIAMYIA** Kovalev, 1990: 126. Type species: *Daiamyia discifera* Kovalev, 1990, by original designation.

**discifera** Kovalev, 1990: 126. PA: Russia (Siberia) (Upper Jurassic/Lower Cretaceous) [C].
