

Family LUANPINGITIDAE

The family Luanpingitidae was proposed by Zhang (1986a) for the monobasic genus *Luanpingites* Zhang, 1986, known only from the Middle Jurassic deposits of Luanping China. The placement of the family follows Zhang (1986a) who considered it close to the Chironomidae.

Ref.: Zhang (1986a, review of taxa).

Genus LUANPINGITES Zhang

LUANPINGITES Zhang, 1986a: 51. Type species: *Luanpingites flavus* Zhang, 1986, by original designation.

flavus Zhang, 1986a: 52. PA: China (Middle Jurassic) [C].
