

Family PROTOSCATOPSIDAE

Protoscatopsidae was originally proposed by Rohdendorf (1946) for the single genus *Protoscatopse* Rohdendorf. Kalugina & Kovalev (1985) added the genus *Mesoscatopse* Kovalev. Both are known only from the Lower to Middle Jurassic deposits of Asia. Rohdendorf (1964) placed the family in his Superfamily Scatopsidea.

Genus MESOSCATOPSE Kovalev

MESOSCATOPSE Kovalev in Kalugina & Kovalev, 1985: 177. Type species: *Mesoscatopse rohdendorfi* Kovalev, 1985, by original designation.

rohdendorfi Kovalev in Kalugina & Kovalev, 1985: 178. PA: Russia (Siberia) (Lower/Middle Jurassic) [C].

Genus PROTOSCATOPSE Rohdendorf

PROTOSCATOPSE Rohdendorf, 1946: 49. Type species: *Protoscatopse jurassica* Rohdendorf, 1946, by original designation.

jurassica Rohdendorf, 1946: 50. PA: Kazakhstan (Upper Jurassic) [C].
