

Family **SIBERHYPHIDAE**

The family Siberhyphidae is known only from Middle Jurassic deposits in Siberia. Kalugina & Kovalev (1985) placed it in relation to Olbiogastrinae. It is tentatively placed in this catalog near the Anisopodidae pending further study of the type material and comparison with related families.

Genus **SIBERHYPHUS** Kovalev

SIBERHYPHUS Kovalev *in* Kalugina & Kovalev, 1985: 123. Type species: *Siberhyphus lebedevi* Kovalev, 1985, by original designation.

lebedevi Kovalev *in* Kalugina & Kovalev, 1985: 124. PA: Russia (Siberia) (Middle Jurassic) [C].
