

Family SINOTENDIPEDIDAE

The family Sinotendipedidae was proposed by Hong & Wang (1990) for the monobasic genus *Sinotendipes* Hong & Wang, 1990. It is known only from the single holotype specimen from Upper Jurassic Laiyang Formation of China. Hong & Wang (1990) placed it close to the Chironomidae and their family Paratendipedidae.

Genus SINOTENDIPES Hong & Wang

SINOTENDIPES Hong & Wang, 1990: 136. Type species: *Sinotendipes tuanwangensis* Hong & Wang, 1990, by original designation.

tuanwangensis Hong & Wang, 1990: 137. PA: China (Upper Jurassic) [C].
