

A REPLACEMENT NAME FOR *SALDULA USINGERI* COBBEN, 1980

In 1980 I described *Saldula usingeri* (Heteroptera, Saldidae) from Molokai and Maui in the Hawaiian Islands (*Pac. Insects* **22**(1-2): 21). It appears that this name had already been in use for a California species described by Polhemus (1967, *Proc. Entomol. Soc. Wash.* **69**: 346-348). Therefore, I hereby propose the replacement name *Saldula robertusingeri* Cobben, new name, for *S. usingeri* Cobben, 1980, nec Polhemus.—**R.H. Cobben**, Agricultural University, Department of Entomology, P.O. Box 8031, 6700 EH Wageningen, The Netherlands

PUBLICATION ANNOUNCEMENT

A REVISION OF THE SUBFAMILY COELIDIINAE (HOMOPTERA: CICADELLIDAE)

IV. Tribe Coelidiini

M. W. Nielson

This is the 4th part in Dr. Nielson's world revision of the leafhoppers in the subfamily Coelidiinae. The tribe Coelidiini, covered in this monograph, has the widest distribution of any tribe treated thus far, occurring in all zoogeographical regions except the Nearctic and Palearctic. The tribe is redefined, and descriptions and illustrations are provided for 186 species; 35 of the 39 known genera and 133 of the 186 valid species are newly described. A separate checklist, with synonyms, is given for all genera and species of the tribe.

PACIFIC INSECTS MONOGRAPH 38

318 pages, 1104 figs.

Price: US\$33.50 (paper cover)

All monographs available from Bishop Museum Press,
P.O. Box 19000-A, Honolulu, Hawaii 96819, USA
