

A LIST OF THE NEUROPTERA OF NEW ZEALAND

By K. A. J. Wise¹

BERNICE P. BISHOP MUSEUM, HONOLULU, HAWAII

The purpose of this list is to bring the nomenclature of New Zealand Neuroptera up-to-date. Further information is given on a recently recorded Coniopterygid species and one species is removed from the New Zealand list. The distribution of genera and species is noted.

In order to determine the range of species within New Zealand, information on the furthest north and south records has been collated from data labels on specimens in the major collections in this country. Synonyms and references are restricted to those directly concerned in present-day nomenclature, or important New Zealand records.

Family CORYDALIDAE

Genus **Archichauliodes** Weele, 1909

Type species: *Hermes diversus* Walker (= *Archichauliodes dubitatus* Weele partim nec Walker).

DISTRIBUTION: New Zealand.

Archichauliodes diversus (Walker, 1853)

Hermes diversus Walk., 1853, Cat. Neur. Ins. Brit. Mus., Pt. 2: 205.

Archichauliodes diversus, Kimmins, 1938, Ann. Mag. Nat. Hist. 11 (2): 354.

Type locality: New Zealand.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Kerikeri (North I.), Dunedin (South I.).

Family CONIOPTERYGIDAE

Genus **Cryptoscenea** Enderlein, 1914

Type species: *Helicoconis australiensis* Enderlein.

DISTRIBUTION: Australia, New Zealand.

Cryptoscenea australiensis (Enderlein, 1906)

Helicoconis australiensis End., 1906, Zool. Jb. (Syst.) 23: 232.

Cryptoscenea australiensis End., 1914, Boll. Lab. Zool. Portici 8: 226.

1. Mail address: c/o Canterbury Museum, Christchurch, New Zealand.

Helicoconis sp. Tillyard, 1926, Ins. Austr. & N. Z., 320 (N. Z.).

Cryptoscenea australiensis, Kimmins & Wise, 1962, Trans. Roy. Soc. N. Z. (Zool.) 2: 35-39 (N. Z.).

Type locality: New South Wales, Australia.

DISTRIBUTION: Australia, New Zealand.

NEW ZEALAND: Auckland (North I.), Nelson (South I.).

A specimen of this species, which confirms Tillyard's record (1926), has recently been found in the collections of Entomology Division, Nelson, N. Z. It is labelled, "Hastings, 25.11.21, J. G. Myers", "Dead leaves *Cordyline australis*", "*Helicoconis novae-zelandiae* n. sp. R. J. Tillyard det."

Specimens were collected at Nelson, in April, 1962, by Mr. E. S. Gourlay, which extends the distribution to the South Island.

Family BEROTHIDAE

Genus **Protobiella** Tillyard, 1923

Type species: *Protobiella zelandica* Tillyard.

DISTRIBUTION: New Zealand.

Protobiella zelandica Tillyard, 1923

Protobiella zelandica Till., 1923, Trans. Proc. N. Z. Inst. 54: 219.

Type locality: Terakohe, nr. Takaka, Golden Bay, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Wayby Gorge, N. Auckland (North I.), Waitati nr. Dunedin (South I.).

Family HEMEROBIIDAE

Genus **Drepanacra** Tillyard, 1916

Type species: *Drepanepteryx humilis* McLachlan (now *Drepanacra binocula* (Newman) var. *humilis* (McLachlan)).

DISTRIBUTION: Australia, Lord Howe I., Norfolk I., Kermadec Is., New Zealand, Chatham Is.

Drepanacra binocula (Newman, 1838)

Drepanepteryx binoculus New., 1838, Ent. Mag. 5: 400.

Drepanepteryx instabilis McLachlan, 1863, Jour. Ent. 2: 115-16 (N. Z.).

Drepanepteryx humilis McL., 1863, Jour. Ent. 2: 115-16 (N. Z.).

Drepanepteryx maori Hare, 1910, Trans. N. Z. Inst. 42: 31 (N. Z.).

Drepanepteryx humilior H., 1910, Trans. N. Z. Inst. 42: 31 (N. Z.).

Drepanacra binocula, Tillyard, 1923, Trans. Proc. N. Z. Inst. 54: 224.

Type locality: New Holland (Australia).

DISTRIBUTION: Australia, Lord Howe I., Norfolk I., Kermadec Is., New Zealand, Chatham Is.

NEW ZEALAND: Auckland (North I.), Tisbury nr. Invercargill (South I.); Chatham Is.

Tillyard (1923) established *Drepanacra binocula* (Newman) as the correct name of this very variable species, reducing species and varieties described by McLachlan (1863), Hare (1910), and himself (Tillyard, 1916, 1917) to varieties of *binocula*.

Genus **Micromus** Rambur, 1842

Type species: *Hemerobius variegatus* Fabricius.

DISTRIBUTION: World.

Micromus tasmaniae (Walker, 1860)

Hemerobius tasmaniae Walk., 1860, Trans. Ent. Soc. Lond. (N. S.) **5**: 186.

Micromus tasmaniae, McLachlan, 1869, Ent. Mon. Mag. **6**: 27.—Hutton, 1899, Trans. Proc. N. Z. Inst. **31**: 233 (N. Z.).

Eumicromus tasmaniae, Kimmins, 1941, Ent. Mon. Mag. **77**: 136 (N. Z.).

Nesomicromus tasmaniae, Kim., 1958, Bull. Brit. Mus. (Nat. Hist.) Ent. **6**: 242 (N. Z.).

Type locality: Tasmania.

DISTRIBUTION: Tasmania, Australia, New Hebrides, Norfolk I., New Zealand, Chatham Is.

NEW ZEALAND: Paihia, N. Auckland (North I.), W. Plains nr. Invercargill (South I.); Chatham Is.

This species falls into the genus *Eumicromus* Nakahara, as keyed and described by Killington (1936), but *Eumicromus* has since been synonymised, with *Nesomicromus* Perkins, by Zimmerman (1957). More recently Tjeder (1961) has synonymised this generic complex under the name *Micromus*, so the present species should again be known as *Micromus tasmaniae*.

Micromus bifasciatus Tillyard, 1923

Micromus bifasciatus Till., 1923, Trans. Proc. N. Z. Inst. **54**: 221.

Type locality: W. Plains nr. Invercargill, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Gisborne (North I.), Tisbury nr. Invercargill (South I.).

Genus **Boriomyia** Banks, 1906

Type species: *Hemerobius disjunctus* Banks.

DISTRIBUTION: World.

Boriomyia maorica Tillyard, 1923

Boriomyia maorica Till., 1923, Trans. Proc. N. Z. Inst. **54**: 221.

Type locality: Dunedin, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Auckland (North I.), Dunedin (South I.).

A group of species, originally in *Boriomyia*, have been transferred to the genus *Kimminsia* by Killington (1937). Although *maorica* belongs to that group it has never actually been transferred and, as the question of *Boriomyia* vs. *Kimminsia* is, at the present time, under discussion, this species is here retained in *Boriomyia*.

Family OSMYLIDAE
Genus **Kempynus** Navás 1912

Type species: *Osmylus excisus* Navás (= *Osmylus incisus* McLachlan).

DISTRIBUTION: New Zealand, Australia, Chile.

Kempynus incisus (McLachlan, 1863)

Osmylus (?) *incisus* McL., 1863, Jour. Ent. 2: 112.

Kempynus incisus, Banks, 1913, Trans. Amer. Ent. Soc. 39: 215.

Kempynus excisus, Navás, 1912, Mem. R. Acad. Barcelona 10: 191.

Type locality: Auckland, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Waipu (North I.), Otago (South I.).

Kimmins (1940) reviewed this and the other species of *Kempynus*.

Kempynus citrinus (McLachlan, 1873)

Stenosmylus citrinus McL., 1873, Ann. Mag. Nat. Hist. ser. 4, 12: 38.

Kempynus citrinus, Banks, 1913, Trans. Amer. Ent. Soc. 39: 215.

Type locality: New Zealand.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Auckland (North I.), Wellington (North I.).

Kempynus latiusculus (McLachlan, 1894)

Stenosmylus latiusculus McL., 1894, Ent. Mon. Mag. 30: 241.

Kempynus latiusculus, Kimmins, 1940, Nov. Zool. 42: 192.

Type locality: Otira Gorge, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Whakapapaiti, Mt. Ruapehu (North I.), Otira and Waiho (South I.).

Genus **Euosmylus** Krüger, 1913

Type species: *Stenosmylus stellae* McLachlan.

DISTRIBUTION: New Zealand.

Euosmylus stellae (McLachlan, 1899)

Stenosmylus stellae McL., 1899, Ent. Mon. Mag. 35: 259-60.

Euosmylus stellae, Krüger, 1913, Stettin. Ent. Ztg. 74: 26, 102-5, 214.—Kimmins, 1940, Nov. Zool. 42: 196.

Type locality: Wainuiomata nr. Wellington, N. Z.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Tongariro (North I.), Arthurs Pass and Ashley Gorge (South I.).

Family MYRMELEONTIDAE

Genus **Weeleus** Navás, 1912

Type species: *Myrmeleon acutus* Walker, 1853.

DISTRIBUTION: New Zealand; elsewhere?

Weeleus acutus (Walker, 1853)

Myrmeleon acutus Walk., 1853, Cat. Neur. Ins. Brit. Mus. Pt. 2, 377.

Weeleus acutus, Navás, 1912, Mem. R. Acad. Barcelona **10**: 173.

Type locality: New Zealand.

DISTRIBUTION: New Zealand.

NEW ZEALAND: Kerikeri (North I.), Wakatipu (South I.).

This insect is commonly known as *Myrmeleon acutus*. Tillyard (1926) rejected the genus *Weeleus* on the grounds that one of the main characters, which Navás (1912) named for separating the genus, is often absent. However, as the species *acutus* Walker is not congeneric with the type species of *Myrmeleon*, *M. formicarius* L., the genus *Weeleus* is here accepted.

A SPECIES REMOVED FROM THE NEW ZEALAND LIST

Cosina neozelandica Navás, 1912

Cosina neozelandica N., 1912, Mem. R. Acad. Barcelona **10**: 168-69.

Type locality: Navás recorded "Patria. Toba, Nueva Zelandica."

This species is not known in New Zealand and there is no such place-name as Toba in this country.

The type specimen is in the British Museum (Nat. Hist.) collections. Following an enquiry, by the present author, Mr. D. E. Kimmins has advised (in pers. comm.) that the British Museum register number covered some Hymenoptera and two Neuroptera from Quetta, presented by the Quetta Museum. As there is a district named Toba, on the Afghanistan-Baluchistan border north of Quetta, this seems sufficient evidence for removing the species from the New Zealand list.

Acknowledgements: The author wishes to acknowledge the assistance of Mr. D. E. Kimmins, British Museum (Nat. Hist.) for his interest and information over a period of many years; Dr. R. A. Cumber and Mrs. B. M. May, Plant Diseases Division, Auckland; Dr. B. A. Holloway, Dominion Museum, Wellington; Mr. E. S. Gourlay, Entomology Division, Nelson; Mr. E. G. Turbott, Canterbury Museum, Christchurch, and Mr. R. Zondag, Forest Research Institute, Rotorua, for the loan of specimens and local information.
