

CATALOG OF ACARI IN THE HAWAIIAN ISLANDS

I. Mesostigmata (or Gamasida) (Acari)

JoAnn M. Tenorio,¹ H.A. Denmark,² and Sabina F. Swift¹

Abstract. This work catalogs 132 species of the mite suborder Mesostigmata recorded from the Hawaiian Archipelago, listing for each species distribution within the islands and pertinent literature references. Nineteen new archipelago and 12 new island records are given. For the Phytoseiidae, 6 new combinations are provided; *Amblyseius rhabdus* is considered a junior synonym of *Amblyseius obtusus*.

In the first catalog of Hawaiian Acarina, Garrett & Haramoto (1967) reported a total of 210 species of Acari for the Hawaiian Islands. Interest in mites in Hawai'i has intensified in the last 17 years and many new records have appeared in the literature. The 1967 catalog, while still useful, is now outdated. A revision incorporating all mites currently recorded in Hawai'i should be useful to present and future workers, both as an index to species known and as a guide to distributional and faunal gaps that might be filled by additional collecting and study. This catalog is the first in a series, each treating a suborder of Acari. We hope that this series will help call attention to species reported from Hawai'i so that Hawaiian material may be included in revisionary studies.

The Mesostigmata is probably the best studied major group of Acari in the Hawaiian Islands but, except for the ticks, may prove to be the smallest once all groups are well reported. Forty-four species belonging to the Mesostigmata were listed by Garrett & Haramoto (1967); the present catalog lists 133 species; 3 of these represent species probably not established in Hawai'i. Nineteen new archipelago records, as well as 12 new island records, are given. It is evident that many additional species remain undiscovered, particularly in the faunally rich soil and litter environs and on the relatively poorly collected islands, i.e., those other than Hawai'i and O'ahu.

Eighteen of the 132 species listed here have been reported only from the Hawaiian Islands; most of these (13) are phytoseiids. An additional 17 taxa are undescribed or not yet identified to species. The mesostigmate fauna shows little evidence at this

1. J. Linsley Gressitt Center for Research in Entomology, Department of Entomology, Bishop Museum, P.O. Box 19000-A, Honolulu, Hawai'i 96817, USA.
2. Chief, Bureau of Entomology, Division of Plant Industry, Florida Department of Agriculture and Consumer Services, P.O. Box 1269, Gainesville, Florida 32602, USA. Contribution No. 604.

time of having a significant endemic component, even in the high elevation native forests surveyed on the Big Island of Hawai'i. Moreover, at least some species now known only from the Hawaiian Islands are likely to be found elsewhere as collection and identification proceed apace in other parts of the world.

The second author (H.A.D.) has recently identified several species of Phytoseiidae new to Hawai'i, primarily from the Bishop Museum collection; these are included herein. In addition to the new records, we also provide the following **new combinations** within the Phytoseiidae: *Typhlodromus haramotoi* Prasad, 1968, *Typhlodromus neobakeri* Prasad, 1968, and *Typhlodromus rhenoides* Athias-Henriot, 1960, are transferred to *Amblydromella* Muma; *Amblyseius haramotoi* Prasad, 1968, to *Euseius* Wainstein; *Amblyseius mauiensis* Prasad, 1968, to *Proprioseiopsis* Muma; and *Amblyseius schusterellus* Athias-Henriot, 1976, to *Chelaseius* Muma & Denmark. *Amblyseius rhabdus* Denmark, 1965 is listed as a **new synonym** of *A. obtusus* (Koch, 1839). Generic concepts used within the Phytoseiidae are those of H.A.D.

Nomenclature for the Hypoaspidinae is that used by Tenorio (1982) for the Hawaiian species, which is essentially that of Karg (1978, 1979).

Information given herein for each species includes the currently accepted name, original genus, distribution, literature references for Hawaiian material, and data for any new collection records. Families are listed alphabetically, with genera and species listed in alphabetical order under their higher categories. Names follow the latest authoritative source found. Species reported in the literature as "sp.," "n. sp.," "sp. A," etc., are lumped as "sp." Distribution includes the type-locality; extra-Hawaiian distribution if any, excluding type-locality; and distribution within the Hawaiian Islands; "HI" [Hawai'i] is listed only when no definite island distribution is known. Numbers given in parentheses following the distribution correspond to document numbers for references in the "Literature Cited" section; references pertain to Hawaiian distribution only. When more than one reference is listed, an asterisk (*) indicates the first report for that species in Hawai'i. Names of species that are not considered established or whose reports are doubtful are preceded by a dagger (†). The identifier for newly recorded species is given if other than the present authors. Depositories for specimens constituting new records are given if other than Bishop Museum (UH refers to the University of Hawaii, Honolulu). Comments or clarification are offered for some records.

The literature search for this catalog was completed in November 1984.

MESOSTIGMATA

Family AMEROSEIIDAE

Afrocypholaelaps africana (Evans, 1963) as *Neocypholaelaps*

DISTRIB.: Angola; Australia, Africa; Hawai'i (13.0)

Neocypholaelaps lindquisti Prasad, 1968

DISTRIB.: Mānoa, O'ahu; O'ahu (14.0, 45.0*)

Family ASCIDAE

Asca aphidiooides (Linnaeus, 1758) as *Acarus*

DISTRIB.: Europe; Europe, N America, New Zealand; Hawai'i, O'ahu (19.0, 35.0*, 55.0)

Asca duosetosa Fox, 1946

DISTRIB.: Puerto Rico; Florida, Guadalupe, Trinidad; Nihoa

NEW ARCHIPELAGO RECORD: Nihoa I: 5°28.3N, Miller Val, 1983 (S. Conant) (ID by M.L. Goff) (UH collection).

NEW ISLAND RECORD: Hawai'i I: 19, Hawai'i Volcanoes National Park, Steaming Bluff Trail, 3.VI.1971, berlese (M.L. Goff) (ID by E.E. Lindquist).

Family DERMANYSSIDAE***Dermanyssus gallinae* (De Geer, 1778) as *Acarus***

DISTRIB.: England; cosmopol.; HI (1.0, 3.0*, 19.0, 43.0)

Family DIPLOGYNIIDAE**Unidentified sp.**

DISTRIB.: Kaua'i (28.0)

Family HALARACHNIDAE***Halarache laysanae* Furman & Dailey, 1980**

DISTRIB.: Laysan I; Laysan (18.0)

Pneumonyssoides caninum* (Chandler & Ruhe, 1940) as *Pneumonyssus

DISTRIB.: USA, Michigan; cosmopol.; O'ahu (5.0*, 19.0)

Family LAELAPIDAE***Androlaelaps casalis* (Berlese, 1887) as *Iphis***

DISTRIB.: Italy; cosmopol.; Hawai'i, O'ahu (10.0*, 19.0)

Androlaelaps hermaphrodita* (Berlese, 1887) as *Laelaps

DISTRIB.: Italy; cosmopol.; Hawai'i, Kaho'olawe, O'ahu, Midway (19.0*, 31.0, 37.0, 41.0, 65.0)

Echinonyssus butantanensis* (Fonseca, 1932) as *Ichoronyssus

DISTRIB.: Brazil; cosmopol.; Hawai'i (19.0*, 57.0, 65.0)

Eulaelaps stabularis* (Koch, 1836) as *Gamasus

DISTRIB.: C Europe; cosmopol.; Hawai'i (19.0*, 65.0)

Hypoaspis (Geolaelaps) aculeifer* (Canestrini, 1884) as *Laelaps

DISTRIB.: Italy; cosmopol.; Hawai'i, Pearl & Hermes (55.0*, 64.0)

Hypoaspis (Laelaps) austriaca* (Sellnick, 1935) as *Laelaps

DISTRIB.: Europe; Europe, N America; Hawai'i (64.0)

†*Hypoaspis (Cosmolaelaps) diversichaetus* (Grokhovskaya & Nguen-Huan-Hoe, 1961) as *Cosmolaelaps*

DISTRIB.: Vietnam; O'ahu (19.0)

REMARKS: Reported by Garrett & Haramoto (19.0) from specimens in Bishop Museum; however, no specimens of this species have been found in that collection. Presence in Hawai'i doubtful.

Hypoaspis (Cosmolaelaps) miles* (Berlese, 1892) as *Laelaps

DISTRIB.: Italy; cosmopol.; Hawai'i, O'ahu, Kure (19.0, 41.0*, 64.0, 65.0)

Hypoaspis (Geolaelaps) queenslandica* (Womersley, 1956) as *Androlaelaps

DISTRIB.: Australia; Israel, South Africa; Hawai'i, Pearl & Hermes, Midway (32.0*, 55.0, 64.0)

Hypoaspis (Alloparasitus) sardoa* (Berlese, 1911) as *Laelaps

DISTRIB.: Sardinia; Europe, Israel, USSR; Hawai'i (56.0, 57.0*, 64.0, 65.0)

Hypoaspis (Cosmolaelaps) scimita* (Womersley, 1956) as *Cosmolaelaps

DISTRIB.: Irian Jaya, "Sansapore"; Australia, New Guinea; Hawai'i, Maui, Midway, Kure (64.0)

***Hypoaspis (Geolaelaps) sp. nr *glabrosimilis** Hirschmann, 1969**

DISTRIB.: Hawai'i, Maui (64.0)

***Laelaps echidninus* Berlese, 1887**

DISTRIB.: Italy; cosmopol.; Hawai'i, Maui, O'ahu, Kaua'i, Midway, Kure (11.0, 19.0, 20.0, 25.0, 41.0, 42.0, 43.0*, 56.0, 57.0, 62.0, 65.0)

Laelaps nuttalli Hirst, 1915

DISTRIB.: Ceylon; widespread in tropical and warm-temperate areas; Hawai'i, Maui, O'ahu, Kure (4.0, 11.0, 17.0*, 19.0, 25.0, 41.0, 42.0, 43.0, 56.0, 57.0, 62.0, 65.0)

Pseudoparasitus (Gymnolaelaps) annectans (Womersley, 1955) as *Gymnolaelaps*

DISTRIB.: Tasmania, Fisher I; Australia, Europe, Kermadecs, New Zealand, S America; Hawai'i (53.0*, 57.0, 64.0, 65.0)

Pseudoparasitus (Pseudoparasitus) stigmaticus (Fox, 1946) as *Myzolaelaps*

DISTRIB.: Puerto Rico; pantropical; Hawai'i, Maui (55.0*, 64.0)

Pseudoparasitus (Ololaelaps) tasmanicus (Womersley, 1956) as *Pristolaelaps*

DISTRIB.: Tasmania (on plants imported to Australia); Australia; Hawai'i, Pearl & Hermes (64.0)

Pseudoparasitus (Pseudoparasitus) trincisus Hunter, 1966

DISTRIB.: Off plants intercepted at Brownsville, Texas and Hawai'i from several tropical areas (Guatemala, Costa Rica, Colombia, Philippines); prob. pantropical; Hawai'i, O'ahu (55.0*, 64.0)

Pseudoparasitus (Gymnolaelaps) vitzthumi (Womersley, 1956) as *Gymnolaelaps*

DISTRIB.: Australia; N America; Pearl & Hermes (64.0)

Family MACROCHELIDAE

Glyptholaspis americana (Berlese, 1888) as *Holostaspis*

DISTRIB.: S America; cosmopol.; Hawai'i, O'ahu (19.0)

NEW ISLAND RECORD: Hawai'i I: 29, "Kahuela" [prob. Kamuela], 4.VI.1984, ex dung beetle (T. Yamamoto) (ID by G.W. Krantz) (UH collection).

Holostaspella sp. undescribed

DISTRIB.: Midway

NEW ARCHIPELAGO RECORD: Midway Is: 239, 38, 1N, Sand I, Areas 2–6, and nr school (ID by G.W. Krantz) (UH collection).

Macrocheles mammifer Berlese, 1918

DISTRIB.: Argentina; cosmopol.; Hawai'i

NEW ARCHIPELAGO RECORD: Hawai'i I: 19, "Kahuela" [prob. Kamuela], 4.VI.1984, ex dung beetle (T. Yamamoto) (UH collection); 19, Kukuihaele, 488 m, 13.XII.1963, ex nest of *Mus musculus* (G.E. Haas) (ID's by G.W. Krantz). O'ahu I: 18, 18.IX.1983, ex leaf litter (J. Petcharat) (ID by D.E. Walter).

Macrocheles muscaedomesticae (Scopoli, 1772) as *Acarus*

DISTRIB.: Europe; cosmopol.; O'ahu (19.0, 38.0*)

Macrocheles peniculatus Berlese, 1918

DISTRIB.: S America; cosmopol.; Hawai'i, O'ahu

NEW ARCHIPELAGO RECORD: Hawai'i I: 119, Kilauea Forest Reserve, 1646 m, 9.VIII–29.X.1971, pitfall in koa-Metrosideros duff (J. Jacobi); 19, same locality, 18.XII.1971, ex *Rattus rattus* (F.J. Radovsky, Q.P. Tomich et al.). O'ahu I: Ka'ala, 20.VI.1967, ex pig nest (N. Wilson) (most ID's by G.W. Krantz).

Macrocheles robustulus (Berlese, 1904) as *Holostaspis*

DISTRIB.: Italy; cosmopol.; O'ahu

NEW ARCHIPELAGO RECORD: O'ahu I: 29, University of Hawaii, 22.IV.1961, Napier grass litter (F. Haramoto) (ID by D.E. Walter).

Macrocheles similis Krantz & Filippini, 1964

DISTRIB.: Australia; O'ahu, Midway

NEW ARCHIPELAGO RECORD: O'ahu I: 59, University of Hawaii, 7.III.1983, ex banana corm (A. Gettman). Midway Is: 69, Sand I, Area 1, 6, 7, and nr school (ID's by G.W. Krantz).

Phytoseius macropilis (Banks, 1909) as *Sejus*

DISTRIB.: Canada, Ontario; Australia, Holarctic Region, India, West Indies; Hawai'i, Moloka'i, O'ahu (12.0*, 15.0, 19.0, 48.0)

REMARKS: The initial report of this species by Cunliffe & Baker (12.0) from "Hawaii" was based on a misidentification and on an erroneous distribution (Denmark, 15.0). However, Garrett & Haramoto (19.0) reported *macropilis* subsequently.*Phytoseius woodburyi* De Leon, 1965

DISTRIB.: Puerto Rico; Caribbean, Florida (USA); Hawai'i, Kaua'i (46.0)

NEW ISLAND RECORD: Hawaii I: 1♀, exotic forest, 0–305 m, 22.I.1974, litter (J. Jacobi).

Proprioseiopsis amplus (Wainstein, 1983) as *Amblyseius*

DISTRIB.: Hawai'i I, Mauna Loa; Hawai'i (68.0)

Proprioseiopsis asetus (Chant, 1959) as *Typhlodromus*

DISTRIB.: USA, West Virginia; N & S America; Hawai'i (68.0)

Proprioseiopsis coniferus (Prasad, 1968) as *Amblyseius*

DISTRIB.: Lāna'i I, Lāna'i City; Hawai'i, Maui, Lāna'i (48.0)

NEW ISLAND RECORD: Hawai'i I: 2♀, 1♂, Hawai'i Volcanoes National Park, Mauna Loa Rd Trail, 2040 m, 16.VI.1970 (M.L. Goff, F.J. Radovsky); 1♀, Mauna Kea, Pu'u Huluhulu, 1890 m, 10.XII.1974, litter (J. Jacobi).

Proprioseiopsis dorsatus (Muma, 1961) as *Amblyseius*

DISTRIB.: USA, Louisiana; tropical; Hawai'i

NEW ARCHIPELAGO RECORD: Hawai'i I: 1♀, Mauna Kea, Pu'u Huluhulu, 1890 m, 4.IX.1974, pitfall (J. Jacobi).

Proprioseiopsis hawaiiensis (Wainstein, 1983) as *Amblyseius*

DISTRIB.: Hawai'i I, Mauna Loa; Hawai'i (68.0)

Proprioseiopsis mauiensis (Prasad, 1968), new combination; as *Amblyseius*

DISTRIB.: Maui I, Upper Kula Church; Hawai'i, Maui, Kaua'i (28.0, 48.0*)

NEW ISLAND RECORD: Hawai'i I: 1♀, Hawai'i Volcanoes National Park, Mauna Loa Rd, 1340 m, 16.VI.1970, grasses & litter (M.L. Goff, F.J. Radovsky).

Proprioseiopsis mexicanus (Garman, 1958) as *Amblyseius*

DISTRIB.: Off plants intercepted at Brownsville, Texas, from Mexico; pantropical; Hawai'i, Maui, Lāna'i, O'ahu, Kaua'i (32.0, 48.0*)

Proprioseiopsis ovatus (Garman, 1958) as *Amblyseiopsis*

DISTRIB.: Intercepted at Brownsville, Texas, from Ecuador; S America; Hawai'i, Maui, Kahoolawe, Lāna'i, Moloka'i, O'ahu, Kaua'i (48.0)

NEW ISLAND RECORD: Kahoolawe I: 1♀, Beck's Cove, 3 m, 12.II.1980, ex *Mus musculus* (M.L. Goff) (ID by M.L. Goff).*Proprioseiopsis rotundus* (Muma, 1961) as *Amblyseius*

DISTRIB.: USA, Oregon; USA; Hawai'i (68.0)

Proprioseiopsis sp. nr *mexicanus*

DISTRIB.: Hawai'i

NEW ARCHIPELAGO RECORD: Hawai'i I: 2♀, Wailuku Riv, 28.II.1971, *Loxops virens wilsoni* nest (C. Van Riper).*Typhlodromalus limonicus* (Garman & McGregor, 1956) as *Amblyseius*

DISTRIB.: USA, California; Caribbean, C & S America, USA; Hawai'i, Maui (48.0)

Typhlodromalus peregrinus (Muma, 1955) as *Typhlodromus*

DISTRIB.: USA, Florida; Caribbean, C America, Mexico, USA; Hawai'i, O'ahu (48.0)

Typhlodromina pini (Chant, 1955) as *Typhlodromus*

DISTRIB.: Canada, British Columbia; Canada, Mexico, USA; Maui (47.0)

Typhlodromips eucalypterus (Prasad, 1968) as *Amblyseius*

DISTRIB.: Maui I, Haleakalā Rd; Maui (48.0)

Typhlodromus sp.

DISTRIB.: O'ahu (69.0)

Family PODOCINIDAE

Podocinum pacificum Berlese, 1896

DISTRIB.: Italy; widespread except Australasia; Hawai'i, O'ahu (19.0*, 55.0)

Podocinum sagax (Berlese, 1882) as *Laelaps*

DISTRIB.: Italy; widespread except Australasia; Hawai'i, Kaua'i (27.0, 32.0*, 55.0)

Family POLYASPIDIDAE

Trachytes sp.

DISTRIB.: Kaua'i (27.0)

Family RHINONYSSIDAE

Larinyssus orbicularis Strandtmann, 1948

DISTRIB.: USA, Texas & New York; prob. cosmopol.; O'ahu

NEW ARCHIPELAGO RECORD: O'ahu I: 1♀, Moku Manu Islet, 2.IV.1962, ex *Sterna fuscata* (N. Wilson) (ID by N. Wilson).

Neonyssus melloi Castro, 1948

DISTRIB.: Brazil; Rwanda, Transvaal; O'ahu

NEW ARCHIPELAGO RECORD: O'ahu I: 19, Honolulu Zoo, 16.XI.1967, ex pigeon (F.H. Haramoto) (ID by Haramoto) (UH collection).

Mesonyssus geopoliae Fain, 1964

DISTRIB.: Malaya/Belgium; Oriental Region; O'ahu (19.0, 71.0*)

Paraneonyssus sp.

DISTRIB.: Hawai'i (21.0)

Ptilonyssus astridae Fain, 1956

DISTRIB.: Rwanda; Africa, Australia; Hawai'i

NEW ARCHIPELAGO RECORD: Hawai'i I: 29,18,1N, Honoka'a, 27.XII.1961, ex *Lonchura punctulata* (N. Wilson) (ID by N. Wilson).*Ptilonyssus hirsti* (Castro & Pereira, 1947) as *Neonyssus*

DISTRIB.: Brazil; prob. cosmopol.; Hawai'i (19.0, 21.0, 70.0*)

Ptilonyssus sairae Castro, 1948

DISTRIB.: Brazil; N America; O'ahu

NEW ARCHIPELAGO RECORD: O'ahu I: 39,28, Honolulu, 20.III.1963, ex Red-crested Cardinal (R.W. Strandtmann) (ID by N. Wilson).

Ptilonyssus sp.

DISTRIB.: Hawai'i, O'ahu (21.0, 61.0)

Rhinonyssus coniventris Trouessart, 1894

DISTRIB.: Europe; prob. cosmopol.; O'ahu (19.0, 70.0*)

Sternostoma tracheacolum Lawrence, 1948

DISTRIB.: South Africa; cosmopol.; O'ahu (60.0*, 61.0)

Family RHODACARIDAE

Athiasella sp. undescr.

DISTRIB.: Hawai'i (55.0)

Rhodacarus sp.

DISTRIB.: Hawai'i, Kure (26.0)

NEW ISLAND RECORD: Hawai'i I: 99,18,1DN, E slope of Mauna Loa, 1206–2440 m, 4.X.1971–6.II.1974, berlese (J. Jacobi, T. Parman); 19, Kilauea Forest Reserve, 1645 m, 28–30.VI.1973, berlese (T. Parman).

Family SEJIDAE

Sejus armatus (Fox, 1947) as *Lirioaspis*

DISTRIB.: Puerto Rico; N America; Hawai'i (19.0)

Family UROPODIDAE

Uropoda sp.

DISTRIB.: O'ahu (19.0, 39.0*)

Family VEIGAIIDAE

Veigaia exigua (Berlese, 1916) as *Cyrtolaelaps*

DISTRIB.: Italy; Europe, Africa; Hawai'i (36.0, 55.0*)

Veigaia nemorensis (Koch, 1839) as *Gamasus*

DISTRIB.: Germany; Algeria, N America, Palearctic Region; Hawai'i (19.0)

Veigaia planicola* (Berlese, 1892) as *Cyrtolaelaps

DISTRIB.: Italy; Holarctic Region, India, Kenya; Hawai'i (23.0, 36.0*)

***Veigaia uncata* Farrier, 1957**

DISTRIB.: USA, North Carolina; quarantine interceptions at Texas and Florida from Mexico, C America, USSR, Africa, Madagascar; Hawai'i, Kaua'i (23.0*, 28.0)

Acknowledgments. Dr M. Lee Goff, Acarology Laboratory, University of Hawaii at Manoa, added considerably to the value of this catalog by allowing us to list unreported species housed in the University collection. R.W. Pemberton and C.E. Turner, USDA, Albany, CA, also kindly allowed us to report the specimens of *Amblyseius herbicolus* from their collections. We appreciate the assistance of the following individuals in providing identifications of rhinonyssids, ascids, macrochelids, and veigaiids, respectively: Dr Nixon Wilson, University of Northern Iowa, Cedar Falls; Dr E.E. Lindquist, Department of Agriculture, Ottawa; Dr G.W. Krantz and Dr D.E. Walter, Oregon State University, Corvallis; and Dr Henry W. Hurlbutt, West Virginia University.
