Rediscovery of *Apterocyclus honoluluensis* Waterhouse on Kauai (Coleoptera: Lucanidae)

J.C. ABBOTT & D. PETR (Department of Biological Sciences, University of North Texas, Denton, TX 76203, USA)

Apterocyclus honoluluensis Waterhouse

Notable rediscovery

The last reported collection of the Kauaian lucanid, *A. honoluluensis* appears to have in 1979 (G.M. Nishida, pers. comm.). On 21 May 1996, a single male (det. Abbott) was collected at dusk while walking along a ridge foot-trail on private property, southwest of the Alakai Swamp in the Waimea District, ca. 1000 m, coll. M. Trimmingham. A review of the known collection records, morphological variation, and biology of *A. honoluluensis* with photographs and illustrations is currently underway by the authors.

New Records for Hawaiian Insects

BERNARR R. KUMASHIRO AND RONALD A. HEU (Hawaii Department of Agriculture, P.O. Box 22159, Honolulu, Hawaii 96823-2159, USA)

All specimens examined in this paper are vouchered in the Hawaii Department of Agriculture (HDOA) collection, unless otherwise noted. BPBM = Bernice Pauahi Bishop Museum; SEL = Systematic Entomology Laboratory, U.S. Department of Agriculture, Beltsville, Maryland; USNM = National Museum of Natural History [formerly United States National Museum]. Authorship of each record, if different than above, is given at the end of the record.

Coleoptera: Nitidulidae

Lasiodactylus sp. prob. tibialis (Boheman) New state record Specimens of a large nitidulid (7 mm x 4 mm) were submitted by Cooperative
