LETTER OF TRANSMITTAL

To the Board of Commissioners of Agriculture and Forestry,
Honolulu, T. H.

GENTLEMEN:—I herewith submit for publication Bulletin No. 2 of this Division entitled "A Catalogue of the Hemipterous Family Aleyrodidae" by G. W. Kirkaldy (Assistant Entomologist of the H. S. P. A. Experiment Station) and "Aleyrodidae of Hawaii and Fiji with Descriptions of New Species" by Jacob Kotinsky (Assistant Entomologist of the Territorial Board of Agriculture and Forestry). The Catalogue compiled by Mr. Kirkaldy is the result of work performed by him in 1904 whilst in the employ of the Territorial Board of Agriculture.

Respectfully Submitted,

ALEXANDER CRAW,
Supt., Division of Ent. and Inspector.

Approved by
Board of Commissioners of
Agriculture and Forestry,

Honolulu, T. H., April 29, 1907.

NOTE:—Owing to corrections and addenda this Bulletin was issued on Sept. 21, instead of Sept. 16.

PART I.

(a) BIOLOGIC SUMMARY

Aleyrodes is said to have been first described by Cestone, who (or his publisher, Vallisnieri) first observed the parasitism of the nymph by "tiny flies".

The oviposition of *Aleyrodes proletella* was well described 170 years ago, in his usual leisurely manner, by Reaumur, and has recently been confirmed in other species by Britton, Morrill and others, who describe and figure the various instars. Reaumur states that the eggs take from 11 to 14 days to hatch while the insects assume the perfect form within another 14 to 17 days, that is to say, the entire transformations take about a lunar month in *A. proletella*. (1).

Reaumur, supposing some seven generations each year during the temperate or warm months, calculates that the descendants, during these seven months, of a single female would, if undisturbed, amount at the lowest estimate to 195,310, and probably more than 200,000.(2). In Hawaii, broods of some species continue almost throughout the year. Very soon after emergence, the sexes unite(3), the female

(1.) Gossard says that in *A. citri* the eggs take from 3 to 20 days to hatch, and gives about 40 days for the entire transformations. Morrill states, for *A. vaporariorum*, 10 to 12 days for hatching and about 40 days for the entire transformations. I have been prevented, by press of other work, from completing my preliminary observations on Hawaiian forms.

(2.) Kirby and Spence (Introd. Ent. III. 89) are said to have misunderstood Reaumur and supposed 200,000 to be the number of ova deposited by one female, but I have not recently seen their account.

(3.) Gossard (p. 609) remarks "the courtship of the white fly, as observed with a pair in confinement, is quite curious. The male showed evidence of having detected the presence of the unimpregnated female at a distance of one-fourth of an inch or more, and approached her nervously, stopping at intervals, especially as the distance was lessened, and swinging his body about excitedly in a semicircle, the head being used as a pivot, his wings in the meantime opening and closing spasmodically, while no movement was made by the female, several retreats were made and she was repeatedly approached from many directions before coition occurred. Upon the trees the males and females rest side by side and two males, one on either side, may often be seen giving their attentions to the same female."

commencing to deposit ova from 18 hours to several days after emergence, according to temperature, etc.

Reaumur observes that the eggs, varying from 8 to 36 in number (Kellogg gives three as the lowest) are arranged around a circular space, previously covered with white powder. Britton cites Westwood's account in the "Gardeners' Chronicle", viz: that Reaumur states that the female first thrusts her beak into the leaf, and depositing an egg, swings about with the beak still inserted and this serving as a pivot, she continues to deposit eggs in a circle of about one millimetre in diameter. There is however, nothing about this pivoting in Reaumur, or in "Westwood's Introduction", and it is probably an additional observation by Westwood himself (4). This pivoting is a well-known characteristic in *Aleyrodes*, but is not universal, as in the same species eggs are often deposited singly and scattered over the surface of the leaf, especially on hairy plants (see Britton, Davis, etc., (5.)). The eggs are usually deposited on the underside of the leaves, and this is indeed where the nymphs also live, though in neither case is this universal. The eggs are transparent whitish (often powdered with the same mealy matter as in the adult) or light green, darkening as the embryo develops. The newly hatched nymph is mobile for a short time but soon becomes stationary, resembling a young scale insect. All the later nymphs (pupae) secrete "honeydew" from the lingua, sometimes so copiously that the case and the adjoining leaf surface are covered with it, the secretion thickening and hardening after emission. Fungus spores germinate in this, and ants visit it for food.

There are four nymphal instars (larvae and pupa); the antennae and legs are functional in the first, rudimentary in the others, being not even externally visible in the second.

The Embryology and Anatomy have been dealt with recently by Cary. Tozzetti published in 1867 a few remarks of comparatively little importance on the anatomy; he des-

(4.) A very good abstract of Reaumur's observations is given in Amyot & Serville (pp. 614-6); I have however read Reaumur's account also.

(5.) The female of *A. bergii*, with the circle of eggs around her, has been depicted by Zehntner.

cribed the filaments arising from the lateral margins of the body and figured them and also the pores which produce the farinaceous matter, noting that they differed in the various species; he further described and figured the digestive apparatus. The structure of the wax-secreting organs has been briefly described by Nasonov.

Morrill believes that *Aleyrodes* is partially parthenogenetic and that the number of adult males and females is in direct proportion to the number of unfertilized eggs; he estimates the proportion occurring in nature as twenty males to sixty-five females (1:3.25); later he makes another count and estimates it as twenty-three to seventy-seven (1:3.35); that is, there are about two males to every seven females.

The injuries caused by the Aleyrodidae are, as a rule, not nearly so serious as those caused by Coccids or Aphids, and it is rarely that a tree dies from an Aleyrodid attack alone, this being confined almost entirely to the leaves; when a tree does succumb, the attacks of the "white flies" are usually followed by those of *Meliola camelliae* (Call), a black saprophytic fungus, which accompanies insects excreting honeydew in any quantity. On the other hand three species of fungi are known to grow naturally in Aleyrodid nymphs, two of them being very successful in reducing *Aleyrodes citri* in Florida; these are an undetermined brown fungus, *Aschersonia aleyrodis* Webber, and *Sphaerostilbe coccophila* Tulasne, while the above-mentioned black fungus, often destroys the nymphs it accompanies (see Gossard pp. 617-27).

The majority of Aleyrodidae are, so far as is known, scarcely of economic importance, though certain species may at any time make a sudden attack upon valuable plants. *A. vaporariorum* and *A. citri*, the two most pernicious forms, are probably species introduced into alien countries, unaccompanied by the parasites and predators that assail them in their endemic habitat; for the present, therefore, artificial remedies, discussed fully by Britton, Morrill, Gossard and others, are largely used in their attempted control. In Hawaii the species attacking Citrus, Hibiscus, Coffee, etc., seem to be kept well under control both by Coccinellids and Hymenopterous Parasites and no very serious damage need be feared.

at present. Owing, however, to the minute size of the Aleyrodidae, it is often difficult to detect the eggs on introduced plants, and to prevent the introduction of pernicious forms, it would be advisable to fumigate all imported plants whatsoever.

(b) SYSTEMATIC SUMMARY

The first known Aleyrodid is said to have been noticed by Cestone in the 17th century, but his account is inaccessible; shortly after, it was described and discussed as a moth by the celebrated Reaumur, this sagacious observer noting however that the farinaceous matter on the organs of flight was not of a similar nature to the "powder" in other moths, and also that the "beak" was constituted very differently. About a quarter of a century later, the father of modern nomenclatorial systems named it *Phalaena (Tinea) proletella*, thus likewise considering it to be a moth. The first to recognize its Hemipterous nature was Latreille, who in 1796 conferred upon it the generic title of *Aleyrodes* (from the Greek "aleuron"—flour); in 1835 Burmeister unnecessarily altered the name to *Aleurodes* and this spelling has continued up till a recent date. Systematic monographs have been published by Signoret in 1868 and Maskell in 1896, while a revision of the family and generic characters was made recently by Cockerell. Previous to this, a new genus *Aleurodicus* was erected by Douglas in 1892, altered to *Aleyrodius* by Howard. Of subgenera, *Asterochiton* was formulated as a Coccid by Maskell, while Cockerell is responsible for three subgenera of *Aleyrodes* and one of *Aleurodicus*. Of recent extensive systematic researches may be mentioned those of Quaintance, Gossard, Bemis and Peal.

It may be noted, in passing, that the date of the first edition of Geoffroy's "Histoire abrégée" is 1762, not 1764; of Maskell's Monograph 1896, not 1895, and of Signoret's Monograph 1868 and not 1867, as usually quoted.

The Aleyrodidae were, as already stated, originally included in the Lepidoptera, and at various later dates considered to be Aphidae, Chermidae or Coccidae, but are now universally deemed to form a separate family, allied to Aphidae on the one hand, and Coccidae on the other.

Cockerell's family diagnosis, slightly altered verbally, is as follows:

"*Adults* of both sexes with two pairs of wings, which are rounded apically and appear more or less mealy; the edges of the wings are ornamented with a distinct sculpture or little bunches of bristles. Antennae simple in form, composed of seven segments; first two segments short and stout. Legs six, all well developed. Eyes often constricted in the middle, or even completely divided, Tarsi with two claws. Size always small.

Egg elliptical, with a short peduncle.

Larva oval, with short, stout legs.

Pupa quiescent, oval, often with a waxy fringe. Margin variously sculptured. Abdomen sometimes with large secretory pores. On the dorsal surface of the abdomen is an orifice, known as the vasiform orifice, provided with a more or less rounded flap, the operculum and a usually elongate narrow bisegmentate structure, the lingua" (1902, Proc. Ac. Nat. Sci. Philadelphia LIV p. 279).

Two genera only are recognized, viz: *Aleurodicus* Douglas 1892 and *Aleyrodes* Latreille 1796. The former, though only separated little more than a decade ago, is the older form, having the median vein of the tegmen forked; in *Aleyrodes* this is degraded to a single unforked vein; the pupal lingua in the latter is also usually much smaller, in *Aleurodicus*, on the contrary, very large, with two or four terminal bristles. *Aleurodicus* is entirely confined to warmer America, with the exception of *A. holmesii* (Maskell) from the Viti Islands, which according to Cockerell, has probably been introduced there from America. *Aleyrodes* is distributed all over the world, almost to the northern limits of the temperate regions. One fossil species (*aculeatus* Menge) from Prussian Amber of the Ligurian Horizon, is known.

1883. "Thirteenth Rep. Illinois State Ent.". p. 98.
Aleurodes aceris and its parasite *Elaptus aleurodis*.
 † 1884. "Fourteenth Rep. Illinois State Ent.". p. 110.

FOSTER, C. H.

- 1892, Apr. "The Orange-leaf Aleurodes." Ins. Life IV p. 274.
A. citrifolii (=*citri*) with note by Riley & Howard.

FRAUENFELD, GEORG RITTER von.

1867. "Zoologische Miscellen. XIII." Verh. Zool. Bot. Ges. Wien XVII 793-799, 1 fig.
 List with notes. *A. jelinekii*, sp. nov.

FROGGATT, W. W.

- 1903, Oct. "Insectarium Notes & Insects found about the Hawkesbury College." Agr. Gaz. New South Wales XIV 1019-27. (also misc. publ. 682).
Aleurodes vaporarium L. (sic!)

FÜESSLY J. C.

1775. "Verzeichniss der ihm bekannten Schweizerischen Insecten", 42.
Phalaena proterella (sic!)

GARMAN, H.

- † 1894. "Observations of farm pests." 3rd Ann. Rep. Kentucky Agr. Sta. (for 1890) 37.
Aleyrodes vaporariorum.
- † 1891, Dec. "A Strawberry Scale Insect." Agr. Science V, pp. 264-5.
 (Noted (June 1892) by Riley & Howard. Ins. Life IV p. 345).

GENNADIOS, P.

- † 1899. "Agricultura ellenica" p. ?

GMELIN, J. F.

1790. Systema Naturae Ed. XIII Vol. I. part 5 p. 2594.
Phalaena (Tinea) proletella,

GEOFFROY, E. L.

1762. "Histoire abrégée des Insectes qui se trouvent aux environs de Paris."
 I, p. 509. *Chermes aceris ovatus* (=*A. acerum*); II, pp. 172-3.
Phalaena seticornis, etc. (=*A. proletella*). The editions of 1762, 1764 and 1799 are almost identical.

GEOFFROY, E. L. in FOURCROY, A. L.

1785. "Entomologia Parisiensis." pp. 230 & 306.*
Chermes aceris & *Phaloena* (sic!) *culiciformis*.

GERSTAECKER, C. E. A.

- † 1863. "Handbuch der Zoologie." II, p. 340.

GILLETTE, C. P.

- 1895, May. "A preliminary list of the Hemiptera of Colorado." Bull. Colorado Agr. Sta. 31, p. 125.
A. pyrolae, sp. nov.

* GEOFFROY, as stated in the preface, is the author of those names, not Fourcroy.

GIRARD, MAURICE.

1885. "Les Insectes. Traité élémentaire d'Entomologie." III pp. 917-9, Pl. 103 f. 16.
 Summary; *A. chelidonii, brassicae, aceris, rubi, quercus.*

GOEZE, J. A. E.

1783. "Entomologische Beyträge" etc. III, 4, p. 98.
Phalaena (Tinea) proletella.

GÖLDI, E. A.

- 1885, Feb. "Aphorismen, neue Resultate und Conjecturen zur Frage nach den Fortpflanzungs-Verhaeltnissen der Phytophtiren enthaltend." Mt. Schweiz. ent. Ges. VII pp. 158-66.

159. *Aleurodes chelidonii* on *Brassica*.

- 1886, June. "Beiträge zur Kenntniss der kleinen und kleinsten Gliederthierwelt Brasiliens II. Neue brasiliatische Aleurodes arten." op. c. pp. 241-50, 9 text f.

Full notes on *A. filicium, goyabae & aepim*, n. spp.

GOSSARD, H. A.

1902. "Review of the White Fly (*Aleurodes citri*). investigations, with incidental problems." Bull. U.S. Ent. n. s. 31, pp. 68-74.

- 1903, June. "White Fly (*Aleurodes citri*)."
 Bull. Florida Agr. Sta., 67, pp. 595-661, Pls. I-V & 3 text fs.
 (With an appendix by T. D. A. Cockerell (pp. 662-6,
 Pl. VI), "The White Fly (*Aleurodes citri*) and its allies".)

2 new species *A. perileuca* & *melanops*, *A. mori* var. *arisonensis*.

- † 1903. "The White Fly." (Bull. Florida Farmer's Inst. I, pp. 29-50.
 (Probably similar to the last cited).

GREEN, E. E.

1904. "Report for 1903 of the Gov. Ent.". Circ. Bot. Gardens Ceylon II pp. 253-4.
Aleurodes sp. on Citronella grass from Colombo.

GUERIN MENEVILLE, F. E.

1844-5 (?) "Iconographie du règne animal de G. Guvier"
etc. VII, pp. 373-4.

Brief summary of characters.

HALDEMAN, S. S.

1850, Jan. "On four new species of Hemiptera of the genus
Ploiaria, Chermes and Aleurodes, and two new Hym-
enoptera, parasitic in the last named genus." Amer.
Journ. Sci. Arts. (2) IX, pp. 108-11, 1 fig.

Aleurodes abutilonea & corni; parasites.

HALIDAY, A. H.

1834, Jan. "Aleyrodes phillyreæ". Ent. Mag. II, pp.
119-20.
n. sp. on *Phillyrea media & latifolia* in Dublin.

PART III.

Reprint of Descriptions published in little accessible works, and not since recognized.

The following are noted :

- A. asparagi* (Lewis).
- A. lacerdae* (Signoret).
- A. lauri* (Signoret).
- A. phalaenoides* (Blanchard).
- A. tinaeoides* (Blanchard).
- A. xylostei* (Westhoff).

ALEURODES ASPARAGI, Lewis.

This was first noticed in 1894 in the Rep. & Proc. Ealing Micr. & Nat. Hist. Soc. for 1893. pp. 1-2, in an account of the exhibition of a new species of *Aleurodes* on leaves of asparagus from Natal, by R. T. Lewis. There are brief general notes on Aleurodidae, but no description of the species, merely a remark that "following the precedents of naming the species after the plants on which they were found, this one was duly called *Aleurodes asparagi*." The description is in Journ. Quekett Micr. Club, 1895, (2) VI 88-93 (as recorded in the Catalogue of species) and the species fully described and figured there.

ALEURODES LACERDAE Signoret.

1883 Bull. S. E. France (6) III, p. LXIII.

"J'ai l'honneur, par l'entremise de notre collègue M. L. Fairmaire, de faire passer sous les yeux de la Société des feuilles de l'*Anona sylvatica* couvertes d'une sécrétion d'aspect cotonneux, ressemblant à de l'amiante et qui m'ont été envoyées par M. Antonio de Lacerda. Cette sécrétion abondante est due à la réunion d'un grand nombre d'*Aleurodes* soit à l'état de larve, soit à l'état d'insecte parfait. J'indique les deux, car je pense que ces deux états contribuent à cet amas de sécrétion par l'examen même de la forme particulière des diverses lamelles; les unes présentent comme des rubans, les autres comme des filaments, d'autres enfin de simples fils. L'insecte parfait est du double plus grand que l'*Aleurodes chelidonii*, jaunâtre, avec des macules brunes sur la prothorax;

l'abdomen, entièrement jaune dans le mâle, offre deux plaques d'aspect particulier dans la femelle, celle-ci présentant un amas cotonneux d'aspect nacré et de forme bilobé de chaque coté de l'abdomen et sécrété par les deux plaques rouges de l'extrémité de l'abdomen. Devant donner une description complète de cette intéressante espèce, que je nommerai *A. lacerdae*, je me contente de présenter aujourd'hui ces feuilles vraiment extraordinaires, car si l'on connaît déjà des espèces du genre *Aleurodes* sécrétant des matières ne se sont présentées en aussi grande quantité."

ALEURODES LAURI Signoret.

1881 op. c., (6) I p. CLVIII.

"Nous donnons aussi la description d'une nouvelle espèce d'Hémiptère, l'*Aleurodes lauri*, récoltée par notre collègue M. Gennadius:

Cette espèce est très voisine, dans son état parfait, c'est à dire ailée, de la *proletella* Linné. Le corps est entièrement jaune; les élytres blanches, sans macules, plus longues que celles de la *proletella*.

Quant à la coque, elle ressemble beaucoup à celle de la *proletella*, mais la sécrétion rayonnée dabord est beaucoup plus longue et comme grandissante; elle occupe plus d'espace et se sépare de distance en distance, ce qui donne à la coque un aspect étoilé.

C'est surtout dans les endroits ombragés que se rencontre cette espèce, assez commune à Athènes, sur la *Laurus nobilis*.

ALEURODES PHALAENOIDES, Blanchard.

In Gay's Historia fisica de Chile Zool. VII 319.

Atlas zoologico. Entomologia, Hemipteros, Pl. 3, fig. 16 (1852).

(P. 319.) A. tota testaceo-rufa, aptennis pedibusque pallidioribus; elytris albis opacis fasciolis duabus interruptis maculaque apicis pallide fuscis; alis totis albis. Long. corp., 1 lin.; extens. alar., 3 $\frac{1}{4}$ lin.

Cuerpo enteramente de un testáceo bermejo y mas ó menos salpicado de blanco. Elitros muy grandes, blancos, ópacos y adornados de dos fajas transversales interrumpidas

en el medio y hacia la punta por una mancha alargada de un color moreno muy claro. Patas pálidas, lo mismo las antenas.

Este insecto es algo común en Santiago sobre las hojas del Parqui y principia á manifestarse en el mes de enero. Copiaremos aquí lo que hemos notado en nuestro diario sobre este animalito.

En la parte inferior de las hojas nuevas del Parqui, (*Cestrum parqui*), se observa una especie de mancha de un verde ligeramente azulento sembrada de muchos huevecitos perfectamente separados unos de otros, de [p. 320] forma ovalar, de color de tierra, alcanzando apenas un dozavo de líneas de diámetro. Poco despues estos huevos cambian de color, vuelvense negruzcos con puntitos blancos, y observados entonces con un lente de aumento se ve que con hembras adornadas con seis puntos dispuestos en dos filas, tres en cada una. Dichos puntos pequeños y algonados grendecen á la par del animal, primeramente extendiéndose del lado de la márgen que sobrepasan para formar una especie de membrana petañosa y recortada á modo de *Bissus* y en seguida hacia al centro, confundiéndose entonces uno con otro para dar lugar a una masa informe, blanquista, algodonada y sembrada de pequeñas gotitas de un licor azucarado, muy apetido de las hormigas que las visitan con mucha frecuencia. Los machos, provistos de grandes alas, se mantienen quietos, ó si le mueven, cambian rara vez de hojas, pero meneando el arbusto, vuelan con precipitacion y á poca distancia, pro no poder sostener largo tiempo el vuelo. Paran principalmente debajo de las hojas y son bastante comunes en la estacion del verano.

Esplicacion de la lámina.

Lam. 3, fig. 16. Animal aumentado. 16a Tamaño natural. 16b Ala superior. 16c Ala inferior. 16d Antena. 16e Tarso.

ALEURODES TINAEOIDES Blanchard.

Op. c. 320.

A. testaceo-rufa; capite nigrescenti; elytris albis, medio-criter opacis, fascis lata media apiceque cinereis; antennis pedibusque pallidis. Long. corp., $\frac{2}{3}$ lin., extens. alar., 1 lin. $\frac{3}{4}$.

Cuerpo de un testaceo bermejo, como en la especie que

precede, per con la cabeza negruzca. Elitros blancos, menos óacos, con una ancha faja hacia el medio y toda la extremidad de un pardusco claro. Alas enteramente blanquizcas. Patas de un amarillento pálido asi como las antenas.

Se halla en los mismos lugares que la que antecede.

ALEURODES XYLOSTEI Westhoff.

Fünfzehnter Jahresbericht des Westfälischen Provinzial-Vereins für Wissenschaft und Kunst für 1886 (published 1887), p. 61.

“Zu Anfang Oktober des Jahres 1885 fand ich im Hausegarten auf der Unterseite mehrerer Blätter von *Lonicera xylosteum*, vereinzelte O. 7 mm. lange Aleurodes-Puppen von weisser Farbe mit dunkelrothen Augen, von denen mir zwei, nach einigen Tagen die Imagines lieferten, die sich bald als von allen Arten deren Beschreibung mir vorliegt, verschieden erwiesen. Auch mit der von Koch (siehe “Die Pflanzenläuse”, Nürnberg, 1857, S. 327) beschriebenen, *Aleurodes lonicera*, welche nach dem Autor ziemlich häufig auf derselben Pflanze angetroffen wird, waren meine Tierchen durchaus nicht identifizirbar.

Die hervorstechenden Körpermerkmale sind folgende: Körperschlank, 0.8 mm. lang; die Hinterleib beim ♂ in einer kräftigen Zange endigend. Kopf mit zwei eingeschnürt, dunklen Augen; Fühler etwa von Zweidrittel der Körperlänge, Glied eins knopf, Glied zwei mehr becherförmig, das dritte Glied das längste, Glied vier gegen zweifünftel bis ein Drittel von drei, Glied fünf noch etwas länger, Glied sechs sieben noch kürzer, letztes Glied am Ende zugespitzt. Schnabel breit bis den Hinterhüften reichend, die dunkle Spitze etwas ausgerandet. Die Flügel breit, eiförmig, weissbepudert, den Körper um mehr als die Hälfte seiner Länge überragend. Die Mitte jedes Flügels von einer Ader durchzogen, welche kurz vor der Spitze einen dunklen Schattenfleckchen trägt. Beine schlank und Körper lang, Längenverhältnisse wie bei der vorgehenden Art (*proletella* L.=*chelidonii*, Latr.). Die Farbe ist ein schmutziges graugelb, die Thorakalbeuten sind dunkler, schmutzig braungrau, Fühler und Beine bleich.

Im Habitus steht diese Art der *proletella* L. nahe, allein sie ist etwas schlanker gebaut und jeder Flügel zeigt nur einen dunklen Schatt Ebflecken. Auch ist die Farbe des Körpers weniger lebhaft und die Zange des ♂ kräftiger und länger.

Die von Koch als *A. lonicerae* beschriebene Art unterscheidet sich von dieser nach Diagnose und Abbildung, 1. durch die Körperfarbe, 2. durch die Einschnürung des vierten Fühlergliedes, 3. durch die einfarbig weissen Flügel und 4. durch die Zange des ♂.

Leider suchte ich im Jahre 1886 an derselben Stelle, sowie auch an anderen Orten nach dieser Art vergebens, vermag daher über ihre biologischen Verhältnisse nichts anzugeben.

3. ACACIAE (Quaintance).

Aleurodes acaciae Quaintance 1900 Bull. U. S. Techn. 8 pp. 12 & 19, Pl. I fs. 4-7 & VII f. 68.

Aleyrodes acaciae Cockerell 1902 Pr. Ac. Sci. Phil. 282.

Bemis 1904 P. U. S. N. Mus. XXVII pp. 479 & 530
Pl. 27 f. 6.

Hab: Mexico & California *baja* on *Acacia*, *Bensera microphylla* and *Rhamnus californica*.

4. ACERUM Kirkaldy n. n.

Chermis aceris ovatus Geoffroy 1762 Hist. Abrég. Ins. Paris I p. 509.

C. aceris Geoffr. in Fourcroy 1785 Ent. Paris p. 210
(nec L.).

Aleurodes aceris Baerensprung 1849, D'Alton & Burmeister
Zeit. f. Zool. I p. 176.

† Bouché 1851 Stett. Ent. Zeit. XII p. 108.

Frauenfeld 1867 Verh. Ges. Wien XVII p.
795 *

Signoret 1868 A. S. E. F. (4) VIII p. 394 Pl.
10 f. I.; Kaltenbach Pflanzenfeinde p. 92.

Douglas 1888 Ent. Mo. Mag. XXIV p. 108.

Lecanium aceris Walker 1852 List. Hom. Brit. Mus. p.
107 (in part).

Aleyrodes aceris Cockerell 1902 P. Ac. Nat. Sci. Phil.
LIV p. 280.

Hab. England, France, Germany, Austria, Hungary, etc., on
Acer campestris and *platanooides*.

Unnamed parasites bred out by Frauenfeld.

5. ACTEAE Britton.

Aleyrodes actaeae Britton 1905 Ent. News. XVI pp. 64-7
Pl. IV.

Hab: Connecticut on *Actaea*.

6. AEPIM (Goeldi).

Aleurodes aepim Goeldi 1886 Mt. Schweiz. Ent. Gen. VII
p. 250, tfs.; Quaintance 1900 Bull, U. S. Techn. 8
pp. 14 & 20, p. 250;

A. aipim Ihering 1897 Rev. Mus. Paul. II 393.

Aleyrodes aepim Cockerell 1902 P. Ac. Sci. Phil. LIV p.
281; Bemis 1904 P. U. S. N. M. XXVII pp. 182 &
494.

Hab: Brazil, Rio de Janeiro, on *Manihot palmata*.

7. ALCOCKI (Peal).

Aleurodes alcocki Peal 1903 J. Asiat. Soc. Bengal 74,
Pl. II fs. 1-9.

Hab: India, Calcutta & Behar, on *Ficus indica* & *religiosa*.

* Frauenfeld figures a pupa which he considers possibly not that of this species.

8. AMNICOLA Bemis.

Aleyrodes amnicola Bemis 1904 P. U. S. N. M. XXVII
pp. 484 & 514 Pl. XXVII f. 4-4a.
Hab: California on *Salix laevigata*.

9. ASPARAGI (Lewis.)

Aleurodes asparagi Lewis 1894 Rep. Ealing Soc. p. I
(not described) & 1895 J. Quekett Mier. Club (2) VI
pp. 28, Pl. II & III.

Aleyrodes asparagi Kirkaldy 1906 Bull. Comm. Agr.
Hawaii Ent. 2 p.

Hab: Natal on *Asparagus officinalis*.

10. ASPLENII (Maskell).

Aleurodes asplenii Maskell 1890 T. N. Z. I. XXII p. 173
Pl. XIII f. 18-20; 1896 op. c. XXVIII p. 423.

Hab: New Zealand on *Asplenium lucidum* and other ferns.

11. AVELLANAE (Signoret).

Aleurodes avellanae Signoret 1868 Ann. Soc. Ent. France
(4) VIII p. 385; Douglas 1893 Ent. Mo. Mag. XXX
p. 154.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 280.

Hab: France, on *Corylus avellana*.

12. AURANTII (Maskell).

Aleurodes eugeniae var. *aurantii* Maskell 1896 T. N. Z. I.
XXVII p. 431, Pl. 29 f. 2.; Peal 1903 J. Asiat. Soc.
Bengal 91.

Aleyrodes aurantii Cockerell Bull. Florida Exp. Sta.
p. 665.

A. (Dialeurodes) do. Cockerell 1902 P. Ac. Sci. Phil. 283.
Hab: India, N. W. Himalayas, on *Citrus aurantium*.

13. AUREOCINCTA (Cockerell).

Aleurodes aureocincta Cockerell 1897 J. N. Y. Ent. V
p. 42; Quaintance 1900 Bull. U. S. Techn. Ser. 8,
pp. 15 & 21.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 282.

A. aureocinctus Bemis 1904 P. U. S. N. M. XXVII pp. 484 & 496.

Hab: New Mexico on *Aquilegia*.

Severely parasitized by *Pterothrix flavimeda* Howard.

14. **AUREUS (Maskell).**

Asterochiton aureus Maskell 1879 T. N. Z. I. XI p. 216, Pl. VII, f. 17d.

Aleurodes melicyti Maskell 1890 op. c. XXII p. 174 & 1896, XXVII p. 436.

Aleyrodes aurea Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab: New Zealand on *Melicytus ramiflorus*.

15. **BAMBUSAЕ (Peal).**

Aleurodes bambusae Peal 1903 Journ. Asiat. Soc. Bengal 85 Pl. IV figs. 1-9.

Hab: India, Calcutta on *Bambusa*.

16. **BANKSIAЕ (Maskell).**

Aleurodes banksiae Maskell 1896 T. N. Z. I. XXVIII p. 423 Pl. 25 pt. I.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.

Hab: Victoria, Australia, on *Banksia integrifolia* & *Callistemon linearis*.

17. **BARODENSIS (Maskell).**

Aleurodes barodensis Maskell 1896 T. N. Z. II. XXVIII p. 424, Pl. 25 Pt. 2; Ind. Mus. Notes III No. 5 p. 53.; Peal 1903 J. Asiat. Soc. Bengal 92.

Aleyrodes barodensis Cockerell 1902 P. Ac. Sci. Phil. 281.

Hab: India, Baroda on *Saccharum officinarum*.

18. **BENGALENSIS (Peal).***

Aleurodes bengalensis Peal 1903 J. Asiat. Soc. Bengal 70 Pl. 2 figs. 10-16.

19. **BERBERICOLA (Cockerell).**

Aleurodes berbericola Cockerell 1896 New York Ent. Soc. p. 207. Quaintance 1900 Bull. Techn. U. S. Div. Ent. 8 pp. 16 and 21.

* Habitat and foodplant not stated. The former presumably Bengal.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282, Pl. XV f. 8. Bemis 1904 P. U. S. N. M. XXVI pp. 485-6.

Hab: New Mexico, on *Berberis*.

20. BERGII (Signoret).

Aleurodes bergii Signoret 1868 Ann. Soc. Ent. France (4) VIII p. 395; Maskell 1890 T. N. Z. I. XXII p. 172.

A. bergi Zehntner 1896 Arch. Java Suikerindustrie 14 p. 939, Pl. XX fs. 1-16. Koningsberger 1898 Med'slands plantentuin XXII p. 4.

A. berghii Krüger 1896 Das Zuckerrohr und seine Kultur p. 315.

A. berghi Kruger op. c. Pl. V f. 1-16.

Aleyrodes bergii Cockerell 1902 P. Ac. Sci. Phil. p. 281. Muir 1906 Bull. H. S. P. A. Ent. 2 p. 5.

Hab: Mauritius; Java; Fiji Isles, Levuka (Koebele) and Rewa (Muir.), on *Saccharum officinarum*.

Preyed on by *Coccinella repanda* (Col) & *Prospalta tristis*; Zehntner (p.947, Pl.XX, figs. 17-21 (Hymen); (see also Kruger p. 315)—destroyed by a fungus (Muir).

21. BRASSICAE Walker.

Aleyrodes brassicae Walker 1852 List. Hom. Brit. Mus. p. 1092; Trail Dict. Gardening I p. 229.

Aleurodes do. Koch (1857) Pflanzenläuse p. 326 Pl. 54, f. 39. Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien XVII p. 795, Pl. I, f. I Tozzetti 1867 Mem. Soc. Ital. p. 24; Signoret 1868 A. S. E. France (4) VIII p. 380; Douglas 1895 Ent. Mo. Mag. XXXI pp. 68 & 97; Sharp 1901 Cambr. Nat. Hist. VI p. 592.

Hab: England, France, Germany, Austria and Hungary on *Brassica oleracea*.

22. CALOPHYLLI Kotinsky.

Aleyrodes callophylae Kotinsky 1907 Bull. 2, Div. Ent. Brd. Agr. & For. Hawaii. p....

Hab: Fiji Isles on *Calophyllum inophyllum*.

23. CAPREAE (Signoret).

Aleurodes capreae Signoret 1868 A. S. E. France (4) VIII p. 384.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 280.
Hab: France on *Salix caprea*.

24. CARPINI (Koch).

Aleurodes carpini Koch (1857) Pflanzenläuse p. 327, 54 f.
395; Frauenfeld 1867 Verh. Zool. Bot. Ges. Wein
XVII p. 795; Signoret 1868 A. S. E. France (4)
VIII p. 382; Kaltenbach (1874?) Pflanzenfeinde
p. 643. Douglas 1895 Ent. Mo. Mag. XXXI p. 117.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.
Hab: England, France, Germany, Austria on *Carpinus betulus*.

25. CERATA (Maskell).

Aleurodes cerata Maskell 1896 T. N. Z. I. XXVIII, p. 425
Pl. 26, pt. I.
Aleyrodes do Cockerell P. Ac. Sci. Phil. p. 281.
Hab: New Zealand, on *Fagus menziesii*.

26. CITRI (Riley & Howard).

Aleurodes citri (Ashmead) 1885 Florida Dispatch N. S.
XI.? (Not valid publication). Riley & Howard
1893 Ins. Life V, p. 219, texfs. 23-4. Riley 1893

A. (Dialeurodes) citri Cockerell 1902, P. Ac. Sci. Phil. p. 283.

Hab: North Carolina, District of Columbia, Louisiana, California, Texas, Florida, Georgia, Mexico, Brazil, (Chili?) & greenhouses generally; on *Citrus* spp.; *Gardenia jasminoides* (florida); *Melia azedarach*, *Quercus aquatica*, *Viburnum nudum*;

(Preyed on by *Chrysopa* (Neur.), a mite and an ant; also by the fungi *Aschersonia aleurodis* Webber, and *Sphaerostilbe coccophila* Tulasne).

27. COCKERELLI (Ihering)

Aleurodes cockerelli Ihering 1897 Rev. Mus. Paulista, II, p. 393, textfs. Quaintance 1900 Bull. U. S. Ent. Techn. Ser. 8 pp. 13 & 22; Hempel 1901 Ann. Mag. N. H. VIII p. 387.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281; Bemis 1904 P. U. S. N. M. XXVII pp. 480 & 496.

Hab: Brazil on *Baccharis paucifloscula*.

28. COMATA (Maskell).

Aleurodes comata Maskell 1896 T. N. Z. I. XXVIII p. 426, Pl. 26 f. 2.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.

Hab: Fiji Isles on an unknown grass.

29. COMPLANATUM (Baerensprung).

Lecanium complanatum Baerensprung 1849 d'Alton & Burm. Zeit. fuer Zool. I, p. 169; ? Signoret 1865 A. S. E. France.

Aleyrodes complanatum Mrs. Fernald 1903 Bull. Massachusetts Agr. Sta. 88, p. 330.

Hab: Germany, on *Acer platanoides*.

30. CORNI (Haldeiman).

Aleurodes corni Haldeiman 1850 Amer. J. Sci. Arts. (2) IX p. 109; Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien XVII, p. 796; Signoret 1868 A. S. E. France (4) VIII p. 398; Quaintance 1900 Bull. U. S. Ent. Techn. 8 pp. 13 & 22.

Aleyrodes corni Cockerell 1902 P. Ac. Sci. Phil. p. 282 ;
Bemis 1904 P. U. S. N. M. XXVII pp. 480 & 496.

Hab : Pennsylvania on *Cornus amomum (sericea)*; *Amitus aleurodinus* Hald. and parasitized by *Eretmocerus corni* Hald.
(Haldeman wrongly supposed the latter might be a parasite on *amitus*.)

31. CORONATA (Quaintance).

Aleurodes coronata Quaintance 1900 Bull. U. S. Ent. Techn. 8 pp. 16 & 22, Pl. I fs. 13-5 & VII f. 69.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282.

A. coronatus Bemis 1904 P. U. S. N. M. p. 485 & 497,
XXVIII f. 9.

Hab : California, on *Arbutus menziesii* *Photinia*, (*Heteromeles*) *arbutifolia*, *Quercus agrifolia*, *chrysolepis* and *densifolia*.

32. COTESII (Maskell).

Aleurodes cotesii Maskell 1896 T. N. Z. I. XXVIII p. 427,
Pl. XXVII pt. I. Peal 1903 J. Asiat. Soc. Bengal
93.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab : Baluchistan, Quetta, on *Rosa* sp.

33. CROCEATA (Maskell).

Aleurodes croceata Maskell 1896 T. N. Z. I. XXVIII p.
428, XXVII pt. 2.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab : New South Wales, on *Styphelia elliptica*.

34. DECIPIENS (Maskell).

Aleurodes decipiens Maskell 1896 T. N. Z. I. p. 428 Pl.
XXVIII pt. I.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab : New South Wales, on *Monotoga (Styphelia) elliptica*.

35. DIASEMUS Bemis.

Aleyrodes diasemus Bemis 1904 P. U. S. N. M. XXVII
pp. 482 & 516.

Hab : California, on *Ribes glutinosum* and *Symporicarpus race-mosus*.

36. DORSEYI, Kirkaldy. n. n.

Aleyrodes quaintancei Bemis 1904 P. U. S. M. XXVII p. 480 & 520; Pl. XXXVII figs. 70-3 (nec Peal).
Hab: California on *Rhamnus crocea*.

37. DUBIA (Heeger).

Aleurodes dubia Heeger 1859 Sb. Kais. Ak. Wien XXXIV p. 226, Pl. 15 fs. 1-8. Frauenfeld 1867 Veh. Zool. Bot. Ges. Wien XVII p. 796.(a) Kaltenbach Pflanzenfeinde p. 433.
Hab: Austria, Germany, on *Fraxinus excelsior*.

38. ERIGERONTIS (Maskell).

Aleurodes erigerontis Maskell 1896 T. N. Z. I. p. 429, Pl. XXVIII pt. 2. Cockerell 1896 Ent. News VI p. 247; Quaintance 1900 Techn. Bull. 8 pp. 13 & 24; Cockerell 1899 Biol. Centr. Amer. Rhynch. Hom. II pt. 2, p. I.
Aleyrodes (Trialeurodes) do. Cockerell 1902 P. Ac. Sci. Phil. p. 282 & 283.
Aleyrodes do. Bemis 1904 P. U. S. M. p. 481 & 498.
Hab: Mexico, on *Erigeron*.

39. ERRANS Bemis

Aleyrodes errans Bemis op. c. pp. 481 & 500 Pl. XXX, fs. 20-1.
Hab: California on *Arbutus menziesii* & *Umbellularis californica*.

40. EUGENIAE (Maskell.)

Aleurodes eugeniae Maskell 1896 T. N. Z. I. XXVII p. 430, Pl. XXIX pt. I & Ind. Mus. Notes IV p. 52; Peal 1903 J. Asiat. Soc. Bengal 90.
Aleyrodes (Dialeurodes) do. Cockerell 1902 P. Ac. Sci. Phil. pp. 281 & 283.
Hab: India, Poona, on *Eugenia jambolana*.

(a) Frauenfeld says this is the same as *phillyreae* Haliday.

41. EUPHORBIAE Loew.

Aleyrodes euphorbiae F. Loew 1867 Verh. Zool. Bot. Ges.
Wien XVII p. 746; Frauenfeld op. c. 796.
Hab: Austria, on *Euphorbia peplus* (? introduced).

42. EXTRANIENS Bemis.

Aleyrodes extraniens Bemis 1904 P. U. S. N. M. XXVII
pp. 482 & 526, Pl. XXXVI fs. 65-7.
Hab: California (Common pest, introduced in conservatories) on
Acrostichum capense, etc.

43. FAGI (Maskell).

Aleurodes fagi Maskell 1890 T. N. Z. I. XXII p. 175 Pl.
13 fs. 25-6 & 1896 op. c. XXVIII p. 432.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.
New Zealand on *Fagus menziesii*.

44. FERNALDI Morrill.

Aleyrodes fernaldi Morrill 1903 Psyche X p. 83, textf;
Britton 1906 Ent. News XVI p. 129.
Hab: Massachusetts and Connecticut, on *Spiraea*; parasitized
by *Encarsia luteola*, How?.

45. FIJIENSIS Kotinsky.

Aleyrodes fijiensis Kotinsky 1907 Bull. 2, Div. Ent. Brd.
Agr. Hawaii, p.
Hab: Fiji Isles on a luguminous plant.

46. FILICIUM (Goeldi).

Aleurodes filicium Goeldi 1886 Mt. Schweiz. Ent. Ges.
VII p. 247, textfs.
Douglas 1891 Ent. Mo. Mag. XXVII p. 44;
Quaintance 1900 Bull. Techn. 8 pp. 13 & 24.
A. filicum Ihering 1897 Rev., Mus. Paul. II, 392.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.
A. filicium Bemis 1904 P. U. S. N. M. XXVII pp.
482 & 499.
Hab: Brazil, Rio Janeiro (also introduced into England, Kew
Gardens) on *Asplenium cuneatum*, *Oleandra articulata* and
Pteris quadriaurita and *quadriolata*.

47. FITCHI (Quaintance).

Apidiotus gossypii (part) Signoret 1868 A. S. E. France
(4) VIII p. 855.

Aleyrodes gossypii (part) Ashmead 1895 Ins. Life VII
p. 323.

Aleurodes do. (part) Marlatt 1899 Ent. News X p. 146.

A. fitchi Quaintance 1900 Bull. U. S. Ent. Techn. 8 p.
14 & 24, Pl. II, fs. 16 & 19 & VII f. 71.

Aleyrodes (Trialeurodes) do. Cockerell 1902 P. Ac. Sci.
Phil. p. 283.

A. do. Bemis P. U. S. M. p. 483.

Hab: Missouri, Mississippi, Alabama & District of Columbia, on
Gossypium "officinale."

Preyed on by "*Thrips tritasciatus*" Ashmead (1894 Ins. Life VII p. 27)

48. FLOCCOSA (Maskell).

Aleurodes floccosa Maskell 1896 T. N. Z. I. XXVIII p.
432, Pl. XXX pt. I.

Quaintance 1900 Bull. Techn. 8 pp. 14 & 26.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p 281.

A. floccosus Bemis 1904 P. U. S. M. XXVII pp.
483 & 500.

(? *A. goyabae*) (sec. Cockerell 1902 Mem. Rev. Soc.
Cient. Antonio Alzate p. 206.)

Hab: Mexico on *Citrus*; Jamaica on *Guaiacum officinale*.

N. B. Possibly an *Aleurodicus* (Cockerell.)

49. FLORIDENSIS (Quaintance)

Aleurodes floridensis Quaintance 1900 Bull. U. S. Ent.
Techn. Ser. 8 pp. 14 & 26, Pl. II fs. 20-2.

Aleyrodes do. Gossard 1903 Bull. Florida Agr. Sta. p. 656
Pl. I, fs. 8-10. Bemis 1904 P. U. S. Mus. p. 483.

Hab: Florida, on *Persea gratissima* and *Psidium guajava*.

50. FODIENS (Maskell).

Aleurodes fodiens Maskell 1896 T. N. Z. I. XXVIII, p. 433
Pl. XXX, pt. 2.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.

Hab: New Zealand, on *Drimys axillaris*.

51. FORBESII (Ashmead).

Aleurodes aceris Forbes 1884, 14th Rep. Illinois State Ent. p. 110; (nec Baerensprung).
Packard 1890 U. S. Ent. Comm. 5th Rep. p. 422.
A. forbesii Ashmead 1893 Bull. U. S. Mus. 45 p. 294
Quaintance 1900 Bull. U. S. Ent. Techn. 8 pp. 15 & 27.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 282; Mor-
rill 1903 Psyche X, 82; Bemis 1904 P. U. S. Mus.
pp. 484 & 503; Britton 1906 Ent. News XVI p. 127.
Hab: New York, Columbia, Massachusetts, Connecticut, Illinois,
on *Acer saccharinum* & *rubrum* (*dasycarpus*). Parasitized
by *Amitus aleurodinus* Haldeman (Hym).

52. FRAGARIAE Walker.

Aleyrodes fragariae Walker 1852 List. Hom. p. 1092.
Cockerell 1902 P. Ac. Sci. Phil. p. 280.
Aleurodes fragariae Signoret 1868 A. S. E. F. (4) VIII
p. 383; Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien
XVII p. 796, Pl. X f. 4. Douglas 1879 Ent. Mo.
Mag. XVI p. 43.
Hab: England, France, on *Fragaria*.

53 FRAXINI (Signoret)

Aleurodes fraxini Signoret 1868 A. S. E. F. p. 386.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. LIV p. 280.
Hab: France, on *Fraxinus excelsior*.

54. FUMIPENNIS (Hempel)

Aleurodes fumipennis Hempel 1899 Psyche VIII p. 394;
Quaintance 1900 Bull. U. S. Techn. 8 pp. 12 & 27.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281;
Bemis 1904 P. U. S. Mus. pp. 479 & 503.
Hab: Brazil, on a grass in swampy ground; accompanied by an
Ant, - *Camponotus* sp.

55. GELATINOSUS (Cockerell)

Aleurodes gelatinosus Cockerell 1898 Can. Ent. XXX p. 264;
Quaintance 1900 Bull. U. S. Techn. 8 pp. 12 & 27.
Peal 1903 J. Asiat. Soc. Bengal 77.

Aleyrodes gelatinosa Cockerell 1902 P. Ac. Sci. Phil. p. 282; Pl. XV fs. 5 & 9.

A. gelatinosus Bemis 1904 P. U. S. Mus. pp. 480 & 503.

Hab: California, Mexico on *Quercus agrifolia* (& *arizonica* ?)

56. GIFFARDI Kotinsky.

Aleyrodes giffardi Kotinsky 1907 Bull. 2 Div. Ent. Brd.

Agr. & For. p.

Hab: Hawaiian Isles on *Citrus*.

57. GLACIALIS Bemis.

Aleyrodes glacialis Bemis 1904 P. U. S. Mus. XXVII pp. 486 & 518, Pl. XXXI fs. 31-3.

Hab: California on *Ceanothus integrerrimus (californicus)*, *Clematis ligusticifolia*, *Opulaster capitatus*, *Rhamnus californica*, *Rubus ursinus (vitifolius)*, *Quercus densiflora*, *Symporicarpus racemosus*.

58. GOSSYPII (Fitch).

Aspidiotus gossypii Fitch 1857 Tr. N. York Agr. Soc. XVII 332.

Diaspis do. Signoret 1870 A. S. E. France (4) X p. 109.
(?). *Chionaspis* (? *Diaspis*) *do.* Cockerell 1895 Ent. News VI p. 157.

Aleurodes do. Ashmead 1895 Ins. Life VII p. 323 (part)
Marlatt 1899 Ent. News X p. 146;

Aleyrodes gossypii Cockerell 1902 P. Ac. Sci. Phil. p. 281.
Hab: China, Ningpo on *Gossypium herbaceum (religiosum)*.

59. GOYABAE (Goeldi).

Aleurodes goyabae Goeldi 1886 Mt. Schweiz Ent. Ges. VII p. 248, textfs. Quaintance 1900 Bull. U. S. Techn. 8 pp. 14 & 27.

A. goyabae Ihering 1897 Rev. Mus. Paul. IV 393.

Aleyrodes goyabae Cockerell 1902 P. Ac. Sci. Phil. p. 281.
Bemis 1904 P. U. S. Mus. XXVII pp. 484 & 505.

Hab: Brazil, Rio de Janeiro, on *Laurus persea* (=? *Persea gratissima*) & *Psidium guaiaba*.

(N. B. =? *floccosa*).

60. GRAMINICOLA (Quaintance).

Aleurodes graminicola Quaintance 1899 Can. Ent. XXXI p. 89 fs. 19-21; and 1900 Bull. U. S. T. Techn. 8 pp. 15 & 28.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282.
 Bemis 1004 P. U. S. Mus. XXVII pp. 484 & 505.
 Hab: Florida on an undetermined grass.

61. HIBISCI Kotinsky.

Aleyrodes hibisci Kotinsky, 1907 Bull. 2, Brd. Agr. For. Hawaii, p....
 Hab: Hawaiian Isles on *Hibiscus rosasinensis* & *Paritium tiliaceum*.

62. HIRSUTA (Maskell).

Aleurodes hirsuta Maskell 1896 T. N. Z. I. XXVIII p. 431, Pl. XXXI Pt. I.
Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.
 Hab: New South Wales, on *Acacia longifolia*.

63. HORRIDUS (Hempel).

Aleurodes horridus Hempel 1899 Psyche VIII p. 394;
 Quaintance 1900 Bull. U. S. Techn. 8 p. 14; Hempel 1904 Bol. Agr. S. Paulo 5 p. 15;
Aleyrodes horrida Cockerell 1902 P. Ac. Sci. Phil. p. 282.
A. horridus Bemis 1904 P. U. S. Mus. XXVII pp. 482 & 505.
 Hab: Brazil, on *Psidium* (accompanied by an ant, *Cremastogaster* sp.) preyed on by

- (1) *Eretmocerus paulistus* Hempel 1904 Bol. Agr. S. Paulo 5 p. 15 f. 2, (Chalcid).
- (2) *Prospaltia brasiliensis* Hempel op. c. p. 20 tf.
- (3) *Signophora townsendi* Ashmead P. U. S. N. XXII p. 412;
- (4) *Cenere townsendi* Hempel, supra.
- (5) Fungi (same as on *A. citri* ?).

64. JELINEKII (Frauenfeld).

Aleurodes jelinekii Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien XVII p. 799; Signoret 1868 A. S. E. F. (4) VIII p. 393 Pl. 9 f. 2.
Aleyrodes do. Cockerell 1902, P. Ac. Sci. Phil. p. 281.
 Hab: France, Austria, on *Viburnum tinus* and *Arbutus unedo*.

65. IMMACULATA (Heeger).

Aleurodes immaculata Heeger 1856 Sb. Ak. Wien. XVIII
p. 33, Pl. I fs. 1-12.

Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien. XVII
p. 796;

Signoret 1868 A. S. E. France (4) VIII p. 390;
Kaltenbach Pflanzenfeinde 293.

Douglas 1884 Ent. Mo. Mag. XX p. 215;
D. Sharp 1901 Cambr. Nat. Hist. VI tf. 287.

Aleyrodes immaculata Cockerell 1902 P. Ac. Sci. Phil. p.
281.

Hab: England, Italy, Austria, Hungary, Germany, on *Hedera*
helix. Preyed on by *Scymnus arcuatus*.

(Rossi) (Col.) sec. Rondani 1874 Bull. S. Ent. Ital. VI p. 54.

66. INCONSPICUA (Quaintance).

Aleurodes inconspicua Quaintance 1900 Bull. U. S. Techn.
8 pp. 16 & 28 Pl. II fs. 23-5.

Aleyrodes do Cockerell 1902 P. Ac. Sci. Phil. p. 282.

A. inconspicuus Bemis 1904 P. U. S. Mus. XVII p.
485 & 505, Pl. 32 fs. 34-37a.

Hab: California on *Arbutus menziesii*, *Clematis ligusticifolia*,
Hibiscus esculentus, *Ipomoea batatas*; *Photinia (Heteromeles)* *arbutifolia*, *Physalis*, *Quercus agrifolia* & *densiflora*,
Rhamnus californica & *crocea*, *Umbellularia californica*.

67. INTERROGATIONIS Bemis.

Aleyrodes interrogationis Bemis 1904 P. U. S. Mus.
XXVII pp. 481 & 510. Pl. XXVIII fs. 10-2.

Hab: California, on *Ceanothus californicus*.

68. IRIDESCENTS Bemis.

Aleyrodes iridescents Bemis 1904 P. U. S. Mus. XXVII
485 & 487. Pl. XXVII fs. 1-2a.

Kellogg 1905 Amer. Ins. fig. 264.

Hab: California, on *Arctostaphylos manzanita*, *Photinia*
(Heteromeles) arbutifolia, *Rhamnus californica* and *crocea*
& *Umbellularia californica*.

69. KELLOGGI Bemis.

Aleyrodes kelloggi Bemis 1904 P. U. S. Mus. XXVII pp. 486 & 499, XXIX p. 13-16.

Hab: California on *Prunus ilicifolia* & *Quercus agrifolia*.

70. KIRKALDYI Kotinsky.

Aleyrodes kirkaldyi Kotinsky 1907 Bull. 2, Brd. Agr. & For. Hawaii p.

Hab: Hawaiian Isles, on *Beaumontia grandiflora*, *Morinda citrifolii* & Catalonian jessamine.

71. LACERDAE (Signoret).

Aleurodes lacerdae Signoret 1883 Bull. S. Ent. France (6) III p. LXXII.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281. Kirkaldy 1907, this Cat. p.

Hab: Brazil, on *Rollinia* (*Anona*) *sylvatica*.

72. LACTEA (Zehntner).

Aleurodes lactea Zehntner 1899 Arch. Java Suikerindustrie VII p. 459 Pl. II, fs. 20-7. Krüger 1896 Zuckerrohr p. 317; Koningsberger 1898 Med'sland plant p. 4.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. 281.

Hab: Java on *Saccharum officinarum*.

Parasitized by? *Encarsia* sp. (Zehntner, supra. p. 462 Pl. II, fs. 18-19).

73. LAURI (Signoret).

Aleurodes lauri Signoret 1881 Bull. S. E. F. (6) P. 1 CLVIII.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281. Kirkaldy 1907 this Cat. p.

Hab: Greece, on *Laurus nobilis*.

74. LEAKII (Peal).

Aleurodes leakii Peal 1903 J. Asiat. Soc. Bengal 87, Pl. V., figs. 4-5.

Aleurodes leakii Kotinsky, 1907 Bull. 2, Div. Ent. Brd. Agr. For. Haw. p.

Hab: India, Behar & Fiji Isles, on *Indigofera arreca* & *tinctoria*.

75. LECANIOIDES (Maskell).

Asterochiton lecanioides (pt.) Maskell 1879 T. N. Z. I. XI
p. 215, Pl. VII, f. 17a-c.

Aleurodes papillifer Maskell 1890 op. c. XXII p. 173
& 1896, op. c. XXVIII p. 438.

Aleyrodes lecanioides Cockerell 1902 P. Ac. Sci. Phil. 281.
Hab: New Zealand, on *Geniostoma ligustrifolium*, *Pittosporum eugenioides* & *Polypodium billardieri*.

76. LIMBATA (Maskell).

Aleurodes limbata Maskell 1896 T. N. Z. I. XXVIII
p. 437, Pl. XXXII pt. I.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab: New South Wales, on *Acacia longifolia* & *Leucopogon juniperinus*.

77. LONGICORNIS (Zehntner).

Aleurodes longicornis Zehntner 1897 Arch. Java Suikerind
V 381; 1899, op. c. VII p. 445 Pl. I. Koningsberger
1898 Med'slands plant XXII, p. 4.

A. longicornis Krüger 1896 Das Zuckerrohr p. 315.

Aleyrodes longicornis Cockerell 1902 P. Ac. Sci. Phil. p.
281.

Hab: Java, on *Saccharum officinarum*.

(Parasitized by *Ablerus pulchriceps*, *Labolips* sp.? & *Aschersonia aleyrodis* (?))

78. LONICERAE Walker.

Aleyrodes lonicerae Walker 1852 List. Hom. p. 1092.

Aleurodes do. (?) Koch 1857 Pflanzenläuse p. 327 Pl. 54 f.
396). Frauenfeld 1867 Verh. Zool. Bot. Ges. Wien
XVII p. 796; Signoret 1868 A. S. E. F. (4) VIII
p. 381; Karsch 1888 Ent. Nachr. XIV p. 31. Douglas
1896 Ent. Mo. Mag. XXXII p. 31.

Hab: England, France, Germany, Austria, on *Campanula trachelioides*, *Impatiens nolitangere*, *Lonicera periclymenum* & *Salvia glutinosa*.

79. MADRONI Bemis.

Aleyrodes madroni Bemis 1904 P. U. S. M. XXVII
pp. 479 & 507, Pl. XVIII fs. 7-8.

Hab: California, on *Arbutus menziesii*.

80. MARLATTI (Quaintance).

Aleurodes marlatti Quaintance 1903 Can. Ent. XXXV p. 61.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282.

Hab: Japan, on *Citrus aurantium*.

81. MASKELLI Bemis.

Aleyrodes maskelli Bemis 1904 P. U. S. M. XXVII pp. 482 & 524, Pl. XXXVII f. 74.

Hab: California, on *Quercus densiflora*.

82. MELANOPS Cockerell.

Aleurodes melanops Cockerell (1902 P. Ac. N. Sci. 282. not descr.) 1903 Bull. Florida Agr. Sta. p. 665, Pl. VI f. 5; Bemis 1904 P. U. S. Mus. pp. 480 & 534.

A. (Tetraleurodes) do. Cockerell 1902 P. Ac. N. Sci. p. 283; not descr.

(var. of *perileuca*?)

Hab: California, on *Quercus*.

83. MERLINI Bemis.

Aleyrodes merlini Bemis 1904 P. U. S. Mus. pp. 482 & 512 Pl. XXIX fs. 17-19.

Kellogg 1905 Amer. Ins. f. 265-7.

Hab: California, on *Arbutus menziesii*.

84. MORI (Quaintance).

Aleurodes mori Quaintance 1899 Can. Ent. XXXI p. 1. fs. 2-8 & 1900 Bull. U. S. Techn. 8. pp. 13 & 29.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282 & 1902 Mem. Rev. Soc. Cient. Antonio Alzate. pp. 205 & 208, tfs.

Bemis 1904 P. U. S. Mus. pp. 480 & 507, Pl. 32 f. 39.

Britton 1906 Ent. News, XVII p. 128.

Aleurodes mori var. Cockerell 1900 Sci. Gossip p. 366.

Aleyrodes mori var. *arizonensis*, Cockerell 1902 P. Ac. Sci. Phil. 282 & Mem. Rev. Soc. Cient. Antonio Alzate p. 205, textfs. on p. 208; & Bull. Florida Agr. Sta. 67 p. 665;

Bemis 1904 P. U. S. Mus. pp. 480 & 534, Pl. 32, fs. 38-38.a

Aleyrodes mori var. *maculata* Morill 1903 Psyche X p. 81.
Hab; California, Arizona, Florida, on *Callicarpa americana*, *Carpinus americana (caroliniana)* *Celtis occidentalis*, *Fraxinus americana*, *Ilex quercifolia (opaca)* *Liquidambar styraciflua*, *Persea carolinensis (borbonia)* and *Tilia americana*; var. *arizonensis* in Mexico, California and Arizona, on *Citrus aurantium*; var. *maculata* on *Cornus florida* & *sanguineus*, also on *Betula*, *Fraxinus* and *Morus*.

85. NEPHROLEPIDIS (Quaintance).

Aleyrodes nephrolepidis Quaintance 1900 Bull. Techn. 8 pp. 16 & 29, Pl. III fs. 26-30.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 282;
Bemis 1904 P. U. S. Mus. XXVII pp. 485 & 535.

Hab: Pennsylvania, on *Nephrolepis* (in conservatories.)

86. NICOTIANAE (Maskell).

Aleyrodes nicotianae Maskell 1896 T. N. Z. I. XXVIII p. 436 Pl. XXXII pt. 2, & Ent. News VII p. 247; Quaintance 1900 Bull. U. S. Techn. 8 pp. 13-31.

Cockerell 1900 Biol. Centr. Am. Hom. II pt. 2 p. I.

Aleyrodes do. Cockerell 1902. P. Ac. Sci. Phil. p. 282;
Bemis 1904 P. U. S. Mus. pp. 481 & 508.

(=?) *Aleyrodes tabaci* Gennadios (sec Cockerell 1902 Mem. Rev. Soc. Cient. Antonio Alzate p. 205).

Hab: Mexico, Guanajuato, on *Nicotiana tabacum*.

87. NIGER (Maskell).

Aleyrodes niger Maskell 1896 T. N. Z. I. XXVIII p. 437,
Pl. XXXIII p. I.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab: Victoria, Australia, on *Acacia pycnantha*.

88. NIGRANS Bemis.

Aleyrodes nigrans Bemis 1904 P. U. S. Mus. XXVII pp. 485-522, Pl. XXVII f. 3.

Hab; California, on *Arbutus menziesii*, *Arctostaphylos manzanita*, *Ceanothus integerrimus* (*californicus*) *Clematis ligusticifolia*, *Eriodictyon crassifolium* (*californicum*), *Photinia* (*Heteromeles*) *arbutifolia*, *Lonicera involucrata*, *Prunus ilicifolia*, *Quercus densiflora*, *Rhamnus californica*, *Symporicarpus racemosus*, *Umbellularia californica*.

89. NUBILANS (Buckton).

Aleurodes nubilans Buckton 1900 Ind. Mus. Notes V p. 36 Pl. V, f. 7-9. Peal 1903 J. Asiat. Soc. Bengal 95.

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.

Hab: India, Backergunge, on *Areca catechu*.

90. PACKARDI Morrill.

Aleurodes vaporarium Packard 1871 Am. Nat. IV p. 685 & 1883 Guide Study Ins. Ed. 8 p. 712 & 1889 op. c. Ed. 9 pp. 526 & 712, Pl. XIV; Garman 1890 Ann. Rep. Kentucky Agr. Sta. p. 37 & 1891 Agr. Sci. V. p. 264.

Aleurodes vaporariorum Riley Ins. Life II p. 17; Riley & Howard Ins. Life IV p. 345; Webster 1895 Rep. Ohio Agr. Sta. 2 (bis) p. 22; Britton Rep. Conn. Agr. Sta. p. 311.

Aleyrodes vaporiorum Britton 1902 Bull. Conn. Agr. Sta. 140 pp. 3, 10, 14, 17; & 1902 Bull. Conn. Agr. Sta. pp. 238, 271, & 1903 Rep. for 1902, pp. 3,148-63. Pls. VIII-XI & f. 6-10.

Aleyrodes vaporarium G. C. Davis 1894 Ins. Life VII p. 174. *Aleurodes sp.* Forbes 1883 13th Rep. Ins. Illinois pp. 93 & I (of addendum); Webster 1894 Rep. Ohio Agr. Sta. p. 35; C. M. Weed & Conradi 1903 Bull. New Hampshire Sta. 100 p. 47.

Aleyrodes sp. Riley 1892 Ins. Life V p. 17; Slingerland 1901 Bull. Cornell Exp. Sta. 190 p. 154.

A. vaporariorum Britton 1896 19th Rep. Conn. Sta. p. 203.

A. packardi Morrill 1903 Can. Ent. XXXV p. 25, Pl. 2; Psyche X p. 83 & Bull. Massachusetts Exp. Sta,

Techn. I p. 53 Pl. VI fs. 32-3; Britton 1906 Ent. News XVII p. 129.

Generally distributed throughout the Eastern States of North America, on *Fragaria*, *Fraxinus*, *Spiraea* & *Ulmus scabra* var. *pendula*.

91. PARVUS (Hempel).

Aleurodes parvus Hempel 1899 Psyche VIII p. 395; Quaintance 1900 Bull. U. S. Techn. 8 p. 14.

Aleyrodes parva Cockerell 1902 P. Ac. Sci. Phil. p. 282.

A. parvus Bemis 1904 P. U. S. Mus. 482 & 508.

Hab: Brazil, on *Maytenus*.

92. PERGANDEI (Quaintance).

Aleurodes pergandei Quaintance 1900 Bull. U. S. Techn. 8 pp. 14 & 31 Pl. III fs. 34-7 & VII f. 72; H. O. Woodworth 1901 Ent. News XII p. 51.

Aleyrodes (Trialeurodes) do. Cockerell 1902 P. Ac. Sci. Phil. p. 283.

A. do. Bemis 1904 P. U. S. Mus. p. 483.

Hab: Columbia, Illinois & Georgia, on *Bignonia radicans*, *Crataegus mollis* & *oxyacanthae*; *Chionanthus virginica*, *Hydrangea*, *Prunus nana* & *persica* (& cultivated plums), *Pyrus coronaria*, *Rubus villosus*, *Viburnum opulus*, *Xanthoxylum americanum* & *Tecoma*

93. PERILEUCA Cockerell.

Aleurodes (Tetraleurodes) perileuca Cockerell (1902 P. Ac. Sci. Phil. p. 282 not described but cited as type of subgenus) and 1903 Bull. Florida Agr. Sta. 67 p. 664 Pl. VI, fs. 2-4.

A. perileucus Bemis 1904 P. U. S. Mus. XXVII pp. 480 & 516.

(=? *A. stanfordi* Bemis op. c. pp. 381 & 508).

Hab: California, Texas, on *Quercus* (upper side of leaves solitarily).

94. PHALAENOIDES (Blanchard).

Aleurodes phalaenoides Blanchard 1852 in Gay's Chile VII, p. 319, Pl. 3 f. 16; Signoret 1868 A. S. E. France (4) VIII p. 399; Maskell 1890 T. N. Z. I. XXII p. 172,

Aleyrodes do. Cockerell 1902 P. Ac. Sci. Phil. p. 281.
 Bemis 1904 P. U. S. Mus. pp. 482 & 512. Kirkaldy
 1907, this Cat. p.
 Hab: Chile on *Cestrum parqui*.

95. PHILLYREAE Haliday.

Aleyrodes phillyreae Haliday 1834 Ent. Mag. II p. 119.
 W. Thompson 1848 P. Ent. S. Lond. V. p. XLVIII.

14.	<i>Phillyceae</i> .	Pyillyreæ.
15.	<i>Pulvinata</i>	<i>Aleurodicus.</i>

PART V.

GEOGRAPHICAL DISTRIBUTION.

It is apparent, from the structure and from the geographical distribution of the Aleyrodidae, that they arose in the Neotropical region where they formed the genus *Aleurodicus*, which, except through human agency, has remained there ever since, sending off a shoot, *Aleyrodes*, which has established itself over the greater part of the world. One *Aleurodicus*, viz : *holmesii*, is found only in Fiji, but, as Cockerell observes, is there on a plant introduced from the Neotropical and is certainly not indigenous. The homes of *Aleyrodes barodensis*, *bergii*, *lactea*, *longicornis* and *sacchari* are unknown, but are most of them probably in the Malay Archipelago. *A. vaporariorum*, known only in greenhouses in the north temperate and out of doors in Hawaii, is probably from the Neotropical, while *A. citri*, destructive in North America, will probably be found native in China. *A. asparagi* from Natal is probably introduced from the palaeartic, and *A. tabaci* from North America into Greece. *A. filicium* has been introduced into European greenhouses on ferns from Brazil. Mr. Kotinsky has recorded *A. leakii* Peal from Fiji, where it is probably an introduced species.

AUSTRALASIAN REGION.

New South Wales: *Aleyrodes croceata*, *decipiens*, *hirsuta*, *limbata*, *stypeliae*, *T-signata*.

Victoria: *Aleyrodes banksiae*, *niger*, *stypeliae*.

Fiji Isles: *Aleyrodes comata*, (*Aleyrodes bergii*, *leakii*, & *sacchari* and *Aleyrodius holmesii introduced*); *calophylli*, *fijiensis*.

New Zealand: *Aleyrodes asplenii*, *aureus*, *cerata*, *fagi*, *fodiens*, *lecanioides*, *simplex*.

AETHIOPIAN REGION.

Mauritius: (*Aleyrodes bergii*, ? *introduced*).

Natal: (*Aleyrodes asparagi*, ? *introduced*).

ORIENTAL REGION.

Java: (*Aleyrodes bergii*, *lactea*, *longicornis*, *spinifera* ? *introduced*).

Bengal: Aleyrodes alcocki, bambusae, bengalensis, leakii, nubilans, quaintancei, religiosa, simula.

Bombay: Aleyrodes barodensis, eugeniae.

Ceylon: Aleyrodes piperis.

PALAEARCTIC REGION.

North China: (Aleyrodes citri ?).

China, Tche Kiang: Aleyrodes gossypii.

Japan: Aleyrodes marlatti.

North West Himalayas: Aleyrodes aurantii.

Baluchistan: Aleyrodes cotesii.

Greece: Aleyrodes lauri, (tabaci, ? introduced).

Austria-Hungary: Aleyrodes acerum, brassicae, carpini, dubia, euphorbiae, jelinekii, immaculata, lonicerae, phillyreae, proletella.

Germany: Aleyrodes acerum, brassicae, carpini, conplanatum, dubia, prenanthis, proletella, vaccinii, xylostei.

Switzerland: Aleyrodes proletella.

France: Aleyrodes acerum, avellanae, brassicae, capreae, carpini, fragariae, fraxini, jelinekii, lonicerae, phillyreae, proletella, quercus, rubi.

England: Aleyrodes acerum, brassicae, carpini, fragariae, immaculata, lonicerae, phillyreae, proletella, quercus, ribium, rubicola, spiraea, (filicum and vaporariorum introduced).

Ireland: Aleyrodes phillyreae.

NEARCTIC REGION.

"*Eastern States*": Aleyrodes packardii.

New York: Aleyrodes forbesii.

District of Columbia: Aleyrodes citri, fitchi, forbesii, pergandei.

Pennsylvania: Aleyrodes abutilonea, corni, nephrolepidis.

Massachusetts: Aleyrodes fernaldi, forbesii.

North Carolina: Aleyrodes citri.

Georgia: Aleyrodes citri, pergandei.

Florida: Aleyrodes abnormis, abutilonea, citri, floridensis, graminicola, mori, plumosa, quercusaquaticae,

ruborum, *rolfsii*, *variabilis* & *Aleurodicus perseae*.

Louisiana: *Aleyrodes citri*.

Alabama: *Aleyrodes fitchi*.

Missouri: *Aleyrodes fitchi*.

Mississippi: *Aleyrodes fitchi*.

Illinois: *Aleyrodes forbesii*, *pergandei*; *Aleurodicus asarumis*.

Colorado: *Aleyrodes pyrolae*.

Arizona: *Aleyrodes mori*.

New Mexico: *Aleyrodes aureocincta*, *berbericola*.

Texas: *Aleyrodes citri*, *fitchim perileuca*.

California: *Aleyrodes amnicola*, *citri*, *coronata*, *diase-mus*, *dorseyi*, *errans*, *extraneus* (? introduced), *gelatinosus*, *glacialis*, *inconspicuus*, *interrogationis*, *iridescens*, *kelloggi*, *madroni*, *maskelli*, *melanops*, *merlini*, *mori*, *nigrans*, *perileuca*, *pruinosus*, *spiraeoides*, *splendens*, *stanfordi*, *tentaculatus*, *vittata*, *wellmanae*.

California baja: *Aleyrodes acaciae*.

Mexico: *Aleyrodes acaciae*, *citri*, *erigerontis*, *floccosa*, *gelatinosus*, *mori*, *nicotianae*, *tracheifer*, *vinsonioides*, *vitrinellus*; *Aleurodicus altissima*, *dugesii*, *iridescens* & *mirabilis*.

NEOTROPICAL REGION.

Puerto Rico: *Aleurodicus minima*.

Jamaica: *Aleyrodes floccosa* & *stellata*; *Aleurodicus jamaicensis* & *ornatus*.

Barbados: *Aleurodicus cocois*.

Chile: *Aleyrodes citri* (?) *phalaenoides*, *tinaeoides*.

Brazil: *Aleyrodes citri*, *cockerelli*, *filicum*, *fumipennis*, *goyabae*, *horridus*, *parvus*, *struthanthi youngi*; *Aleurodicus anonae*, *cockerelli* & *cocois*.

British Guiana: *Aleurodicus anonae*, *cocois*.

Trinidad: *Aleurodicus anonae*, *cocois pulvinata*.

British Honduras: *Aleurodicus cocois*.

Venezuela: *Aleurodicus cocois*.

UNATTACHED REGION.

Hawaii: *Aleyrodes giffardi*, *hibisci*, *kirkaldyi*, *sonchi*, *vaporariorum*, (all introduced).

PART VI.

ENEMIES.

The Aleyrodidae are extensively parasitized by Hymenoptera and devoured by Neuroptera and Coleoptera, also by Thysanoptera, Hymenoptera (ants) and Mites, as set forth below. Their destruction by fungi is apparently also extensive. In Diptera, the Anthomyiid *Coenosia solita* is recorded as preying upon these insects, and also *Agromyza ornata*, the latter surely a mistake, as it is a stem-burrower in plants. These records are almost entirely compiled and I accept no responsibility for their accuracy.

(a) DIPTERA.

FAMILY AGROMYZIDAE.

AGROMIZA ORNATA.

The species of this genus have been largely recorded as vegetarian, stem-burrowers and so forth, but *A. chermivora* Kalt., and *Meoneura obscurella* (Fall.) attack Coccidae according to Rondani.

FAMILY ANTHOMYIIDAE.

COENOSIA SOLITA Walker 1850-6, Dipt. Saund. 368.

Attacks *Aleyrodes*, according to Chittenden 1901 Bull. U. S. Ent. 27 p. 112.

COLEOPTERA.

FAMILY COCCINELLIDAE.

1. Larvae of Coccinellidae feed on young *Aleurodes* (Reaumur).
2. *Scymnus arcuata* (Rossi).
Coccinella arcuata Rossi 1794 Mant. Ins. II 88.
Preys on *Aleyrodes immaculata*.
3. SCYMNUSS sp?
Preys on *A. phillyreae* and *proletella*.

4. COCCINELLA REPANDA Thunberg.

C. Repanda Th. 1781 Nov. spec. Ins., I 18, fig. 25.

Preys on *A. bergii* in Java and on *A. Hibisci* in Hawaii.

HEMIPTERA.

Harpactor iracundus (nymph) sucks *Aleyrodes*, (Swinton).

HYMENOPTERA.

CHALCIDOIDEA. FAMILY TRICHOGRAMMATIDAE.

1. CHAETOSTRICA PRETIOSA (Riley).

Trichogramma pretiosa Lintner 1885 Second Rep.

New York Ent. 220. Riley 1879 Can. Ent. XI 161; on *Aleyrodes* (Lintner).

FAMILY APHELINIDAE.

2. ERETMOCERUS CALIFORNICUS Howard.

E. californicus How. 1895 Techn. Bull. U. S. Ent. I, 16
figs. 1 & 3.

From *Aleyrodes* sp., from California, on *Quercus agrifolia*.

3. E. CORNI Haldeman.

E. Corni Hald. 1850 Amer. J. Sci. Arts (2) IX 110, fig;
Howard 1895 1. c. fig. 2.

Howard says from *Aleyrodes corni*; Haldeman supposes
it to be from *Amitus aleurodinus*.

Kotinsky records (see below) from *Aleyrodes hibisci* in
Hawaii.

4. E. PAULISTUS Hempel.

E paulistus Hemp. 1904 Bol. Agr. S. Paulo 5 p. 15 fig. 2.
On *Aleyrodes horridus*.

5. PTEROPTRIX FLAVIMEDIA (Howard).

Gyrolasia flavimedia Howard 1881 Rep. U. S. Dep. Agr.
(for 1880) 369 Pl. 24. f. 5; Lelong 1890 Rep. S. B. Hort.
California (1889) 285, f. 136.

Pteroptrix do. Howard 1895 Techn. Bull. U. S. Ent. I. 18 fig. 4. From various species of *Aleyrodes* (not determined) from California, New Mexico (and Jamaica?).

6. THYSANUS ATER Haliday.

T. ater Hal. 1840 in Walker Nat. Hist. IV 234.

This genus attacks Aleyrodidae, according to Howard (1891).

7. ENCARSIA ANGELICA Howard.

E. angelica How. 1895 Techn. Bull. U. S. Ent. I. 30. From *Aleyrodes* sp. on Willow, from California.

8. E. COQUILLETTI Howard.

E. coquilletti How. 1895 op. c. 29, f. 9.

From *Aleyrodes* on *Sonchus* from California.

9. E. LUTEOLA Howard.

E. luteola How. 1. c.

From *Aleyrodes* (? *fernaldi*) from District of Columbia.

10. E. sp. (?) Zehntner.

1899 Arch. Java Suiker VII 462 Pl. II fs. 18-19.

From *A. lactea* from Java.

10a. E. sp. (?) Kotinsky.

Bull. 2 Div. Ent. Brd. Agr. & For., 1907, p. (see Part VIII).

11. (?) COCCOPHAGUS sp.

On *Aleyrodes phillyreae*.

12. PROSPALTA (?) TRISTIS Zehntner.

P. tristis Zehntner 1896 Arch. Java Suiker. XIV 947 Pl.

20 figs. 17-21;

Krüger 1896 Das. Zuckerrohr und seine Kultur 315.

From *Aleyrodes bergii* from Java.

13. P. (?) BRASILIENSIS Hempel.

P. brasiliensis Hemp. 1904 Bol. Agr. São Paulo V p. 20, fig.

On *Aleyrodes horridus*.

14. ABLERUS PULCHRICEPS Zehntner.

A. pulchriceps Zehntn. 1899 Arch. Java Suiker. VII 454,
Pl. II figs. 15-17.

FAMILY EUPELMIDAE.

15. EUPELMUS UROZONUS Dalman.

E. urozonus Dalm. 1820 Svensk. Vet. Handl., XLI 378=
Macroneura maculipes (Walker) Rondani 1874 Bull. S. E.
Ital. VI 54.
On *Aleyrodes proletella* (Rondani).

FAMILY MYMARIDAE.

16. ALAPTUS MINIMUS Walker.

A. minimus Walk. 1846 A. M. N. H. XVIII 51.
On *Aleyrodes proletella*.

FAMILY PLATYGASTRIDAE.

17. AMITUS ALEURODINUS Haldeman.

A. aleurodinus Hald. 1850 Am. J. Sci. Arts (2) IX.
A. aleurodinus Ashmead 1893 Bull. P. U. S. Mus. p. 293
Pl. 12 f. 8.
Elaptus aleurodis Forbes 1884 14 Rep. Ins. Illinois 110
Pl. 11 f. 6.
On *Aleyrodes corni*.

FAMILY DIAPRIDAE.

18. LABOLIPS sp. Zehntner.

1899 Arch. Java Suiker. VII 455, Pl. 2 fs. 13-14.
On ?

SUPERFAMILY FORMICOIDEA.

20. CREMASTOGASTER sp. "accompanies" *Aleyrodes horridus* Hempel.
21. CAMPONOTUS sp. "accompanies" *A. fumipennis* Hempel.

22. Carnivorous ant destroys eggs and nymphs of *A. citri* (Gossard).

NEUROPTERA.

23. CHRYSOPA sp. destroys *Aleyrodes citri*.

THYSANOPTERA.

24. "Thrips" TRIFASCIATUS Ashmead.

Thrips trifasciatus Ashmead 1894 Ins. Life VII 27.

Is said to prey on the North American *Aleyrodes fitchi*, but is indeterminable from the descriptions.

ACARINA.

1. Mites prey on eggs and nymphs of *Aleyrodes citri* (Gossard).

FUNGI.

1. ASCHERSONIA ALEYRODIS Webber 1897 Bull. U. S. Veget. Path. XIII 20;
Saccardo Syll. Fung. Carpol. XIV 991.
Sellards 1906 Rep. Florida Agr. Sta. for 1905 p. 26.
Attacks *Aleyrodes citri*.

2. SPHAEROSTILBE COCCOPHILA Tulasne.

Carp. III 105; Saccardo Syll. Fung. Carp. II 513;
S. coccophila Sellards op. c. supra 26.

Occurs in U. S. of America, Cuba, Ceylon, and attacks
Aleyrodes citri (& *horridus* & *longicornis*? See
Zehntner 1899 Arch. Java Suik. VII 457).

PART VII.

FOODPLANTS.

This list is arranged alphabetically for convenience; the proportion known of the species of Aleyrodids is so small that their floral distribution cannot yet be usefully considered. Owing to the meagerness of information in most cases, many of the food-plants remain uncertain specifically and even generically. † = genus or species that I cannot trace

<i>Food-plant.</i>	<i>Species of Aleyrodid.</i>
Abutilon	vaporariorum
A. avicennae	abutilonea
Acacia longifolia	hirsuta, limbata, T-signata
A. pycnantha	niger
Acer campestris	acerum
A. dasycarpus (see saccharinum)	
A. negundo	
A. platanoides	acerum, complanatum
A. rubrum	forbesii
A. saccharinum	do.
A. sp.	vaporariorum
ACROSTICHUM capense	extraneus
ACTAEA alba	asarumis
AESCULUS californica	spiraeoides
AGERATUM mexicana	vaporariorum
ANONA muricata	anonae
A. reticulata	do.
A. squamosa	do.
A. sylvatica (see ROLLINIA)	vaporariorum
ANTIRRHINIUM	
APHELANDRA	do.
AQUILEGIA	aureocincta, vaporariorum
ARBUTUS menziesii	coronata, errans, inconspicua, madroni, merlini, nigrans.
A. unedo	jelinekii
ARCTOSTAPHYLOS manzanita	iridescent, nigrans

A. sp.	hutchingsii
ARECA catechu	nubilans
ASARUM canadense	asarumis
ASPARAGUS officinalis	asparagi
ASPLENIUM cuneatum	asplenii, filicum
A. lucidum	filicum
BACCHARIS paucifloscula	cockerelli
BANKSIA integrifolia	banksiae
BEGONIA sp.	dugesii
BENSERA microphylla	acaciae
BENZOIN oderiferum	vaporariorum
BERBERIS sp.	berbericola
B. vulgaris (=thunbergii)	vaporariorum
BIGNONIA sp.	do.
B. radicans (see TECOMA)	
BOMBAX malabaricum	simula
BRASSICA oleracea	brassicae, proletella, youngi.
CALLICARPA americana	mori
CALLISTEMMA hortensis	vaporariorum
CALLISTEMON linearis	banksiae
CAMPANULA sp.	vaporariorum
C. trachelioides	lonicerae
CAPSICUM sp.	ornatus
CARICA papaya	variabilis
CARPINUS americana (=caro- liniana)	mori
C. betulus	carpini
CATALPA sp.	mori, vaporariorum
CEANOOTHUS integrerrimus (=californicus)	glacialis, interrogationis, nigrans
CELTIS occidentalis	mori
CESTRUM parqui	phalaenoides, tinaeoides
CHELIDONIUM maius	proletella
CHIONANTHUS virginica	pergandei
CHRYSANTHEMUM sp.	vaporariorum
CITRUS aurantium	{ aurantii, citri, crawii, floccosa, marlatti, mori var. arizonesis, spinifera, struthanthi, (vitrinellus?)

<i>CLEMATIS ligusticifolia</i>	{ <i>glacialis</i> , <i>inconspicua</i> , <i>nigrans</i>
	{ <i>tentaculatus</i>
<i>COCOS nucifera</i>	<i>cocois</i>
<i>COFFEA</i> sp.	
<i>COLEUS</i> sp.	<i>vaporariorum</i>
<i>CONVOLVULUS occidentalis</i>	<i>spiraeoides</i>
<i>C. sepium</i>	do.
<i>COPROSOMA lucida</i>	<i>simplea</i>
<i>COREOPSIS lanceolata</i>	<i>vaporariorum</i>
<i>CORNUS amomum</i> (= <i>sericea</i>)	<i>corni</i>
<i>C. florida</i>	<i>mori</i>
<i>C. sanguinea</i>	do.
<i>CORYLUS avellana</i>	<i>phillyreae</i>
<i>CRATAEGUS mollis</i>	<i>pergandei</i>
<i>C. oxyacanthae</i>	do.
<i>CUCUMIS melo</i>	<i>vaporariorum</i>
<i>C. sativus</i>	do.
<i>CUCURBITA maxima</i>	do.
<i>CUPHEA</i> sp.	do.
<i>DAHLIA</i> sp.	<i>spiraeoides</i>
<i>DRIMYS axillaris</i>	<i>fodiens</i>
<i>ERIGERON philadelphicus</i>	<i>vaporariorum</i>
<i>E. sp.</i>	<i>erigerontis</i>
<i>ERIODICTYON crassifolium</i> (= <i>californicum</i>)	<i>nigrans</i>
<i>EUGENIA jambolana</i>	<i>eugeniae</i>
<i>EUPHORBIA peplus</i>	<i>euphorbiae</i>
<i>FAGUS menziesii</i>	<i>cerata</i> , <i>fagi</i>
<i>FICUS indica</i>	<i>alcocki</i>
<i>F. religiosa</i>	<i>alcocki</i> , <i>quaintancei</i> , <i>religiosa</i>
<i>F. sp.</i>	<i>anoneae</i>
<i>FRAGARIA</i> sp.	<i>fragariae</i> , <i>packardi</i>
<i>FRAXINUS excelsior</i>	<i>dubia</i> , <i>fraxini</i> , <i>packardi</i> , <i>phil-</i> <i>lyraeae</i>
<i>F. americana</i>	<i>mori</i>
<i>FUCHSIA</i> sp.	<i>spiraeoides</i> , <i>vaporariorum</i>
<i>GARDENIA jasminoides</i> (= <i>florida</i>)	<i>citri</i>
<i>GENIOSTOMA ligustrifolium</i>	<i>lecanioides</i>

GERANIUM (cultivated)	
GONOLOBUS sp.	rolfsii, vaporariorum
GOSSYPIUM herbaceum (=religiosum)	vaporariorum
G. officinale (=sp. ?)	gossypii
GREVILLEA robusta	fitchi
GUAIACUM officinale	vaporariorum
HEDERA helix	floccosa, stellata
HELIOTROPIUM peruvian- um (?)	vaporariorum
	do.
<i>Heteromeles</i> see PHOTINIA	
HIBISCUS esculentus	inconspicua
H. moscheutos	vaporariorum
H. rosasinensis	dugesii, hibisci, vaporariorum
HICORIA sp.	vaporariorum
HYDRANGEA sp.	pergandei
IATROPHIA sp.	pulvinata
ILEX quercifolia (=opaca)	abnormis, mori, plumosa
IMPATIENS nolitangere	lonicerae
INDIGOFERA arrecta	leakii
I. tinctoria	do.
IPOMOEA batatas	inconspicua
I. purpurea	vaporariorum
IRIS (cultivated)	spiraeoides
IUGLANS cinerea	vaporariorum
LACTUCA sativa	do.
LANTANA camara	do.
LAVENDULA dentata	do.
LAURUS nobilis	lauri
L. persea see PERSEA	
LEUCOPOGON juniperinus	limbata
L. richei	stypheliae
LILIUM superbum	vaporariorum
LIQUIDAMBAR styraciflua	mori
LONICERA involucrata	nigrans, perileuca, spiraeoides, tentaculatus
L. periclymenum	lonicerae
L. xylosteum	xylostei
L. sp.	vaporariorum
LORANTHUS flexicaulis	struthanthi

LYCOPERSICUM esculentum	vaporariorum
MAGNOLIA glauca	abnormis, plumosa
M. grandiflora	plumosa
MALVA rotundifolia	spiraeoides
MANIHOT palmata	aepim
MAURANDIA sp.	vaporariorum
MAYTENUS sp.	parvus
MELIA azedarach	citri
MELICYTUS ramiflorus	aureus
MESPILUS sp.	phillyreae
MICHELIA flava	struthanthi
MONARDA sp.	vaporariorum
MONOTOCA elliptica	croceata, decipiens
MORUS sp.	mori
MUSA sp.	cocois
MYRIOPHYLLUM proserpin-	
acoides	vaporariorum
NEPHROLEPIS sp.	nephrolepidis
NICOTIANA glauca	spiraeoides
N. tabacum	nicotianae, tabaci, vaporariorum
OLEANDRA articulata	filicum
OPULASTER capitatus	glacialis, perileucus, spiraeoides, tentaculatus
OXALIS sp.	vaporariorum
PELARGONIUM sp.	do.
PERSEA carolinensis (=bor-	
bornia)	abnormis, mori, persea, plumosa
P. gratissima (=Laurus per-	floridensis, goyabae, lauri
sea ?)	
PHILLYREA latifolia	phillyreae
P. Media	do.
PHLOX sp.	vaporariorum
PHOTINIA arbutifolia	coronatus, inconspicuus, irides-
	cens, nigrans, pruinibus
PHYSALIS sp.	inconspicua
PHYTOLACCA decandra	vaporariorum
PIPER (nigrum ?)	piperis
PITTOSPORUM eugeinoides	lecanioides, simplex
PLANTAGO maior	spiraeoides
PLATYCODON sp.	vaporariorum

POLYPODIUM billardieri	lecanioides
PROSOPIS juliflora	acaciae
PRUNUS ilicifolia	kelloggi, nigrans
P. persica	pergandei
P. triflora	vaporariorum
P. virginiana (=nana)	pergandei
PSIDIUM cattleianum	cockerelli
P. guajava	cocois, floridensis, goyabae, minima
P. sp.	horridus
PTERIS quadriaurita	filicum
PYROLA rotundifolia	pyrolae
PYRUS coronaria	pergandei
P. sp.	phillyreae
QUERCUS aquatica	abnormis, citri, quercusaquaticae
Q. agrifolia	{ coronata, gelatinosus, inconspicua, kelloggi, nigrans, splendens, stanfordi, tentaculatus
Q. arizonica	gelatinosus
Q. carolinensis	abnormis
Q. catesbaei	do.
Q. chrysolepis	coronata
Q. crocea	dorseyi, iridescent
Q. densifolia	{ coronata, gelatinosus, glacialis, inconspicua, maskelli, standfordi, tentaculatus
Q. densiflora	maskelli, nigrans
Q. pedunculata	quercus
Q. robur	proletella
Q. virginiana (=virens)	abnormis
Q. sp.	melanops, perileuca
RICHARDIA africana	vaporariorum
R. pacifica	anonae
RHAMNUS alaternus	phillyreae
R. californica	{ acaciae, glacialis, inconspicua, iridescent, nigrans, splendens, wellmanae

<i>R. crocea</i>	<i>inconspicua, quaintancei</i>
<i>RHODOTYPOS kerrioides</i>	<i>vaporariorum</i>
<i>RHUS toxicodendron</i> (=diver- siloba)	<i>perileuca</i>
<i>RIBES glutinosum</i>	<i>diasemus</i>
<i>R. nigrum</i>	<i>ribium</i>
<i>R. rubrum</i>	<i>do.</i>
<i>R. sp.</i>	<i>vaporariorum</i>
<i>ROLLINIA sylvatica</i>	<i>lacerdae</i>
<i>ROSA laevigata</i>	<i>spiraeoidea</i>
<i>R. sp.</i>	<i>cotesii, spinifera, vaporariorum</i>
<i>RUBUS cuneifolius</i>	<i>ruborum</i>
<i>R. fruticosus</i>	<i>rubi</i>
<i>R. villosus</i>	<i>pergandei</i>
<i>R. ursinus</i> (=vitifolius)	<i>glacialis</i>
<i>R. sp.</i>	<i>rubicola</i>
<i>RUDBECKIA laciniata</i>	<i>vaporariorum</i>
<i>SACCHARUM officinarum</i>	{ <i>barodensis, bergii, lactea,</i> { <i>longicornis, sacchari</i>
<i>SALIX caprea</i>	<i>capreae</i>
<i>S. laevigata</i>	<i>amnicola</i>
<i>SALVIA glutinosa</i>	<i>lonicerae</i>
<i>S. splendens</i>	<i>vaporariorum</i>
<i>SAMBUCUS nigra</i>	<i>spiraea</i>
<i>SCHINUS molle</i>	<i>vaporariorum</i>
<i>Sida abutilon</i> see <i>ABUTILON</i>	<i>avicennae</i>
<i>SMILAX sp.</i>	<i>vaporariorum</i>
<i>SOLANUM nigrum</i> (=douglasii)	<i>spiraeoides</i>
<i>S. tuberosum</i>	<i>vaporariorum</i>
<i>SOLIDAGO canadensis</i>	<i>do.</i>
<i>SONCHUS oleraceus</i>	<i>prenanthes, sonchi, spiraeoides</i>
<i>SPIRAEA ulmaria</i>	<i>spiraeae</i>
<i>S. sp.</i>	<i>fernaldi, packardi</i>
<i>Struthanthus</i> see <i>LORANTHUS</i>	
<i>Styphelia</i> see <i>LEUCOPOGON</i> & <i>MONOTOMA</i>	
<i>SYMPHORICARPOS</i> race- mosus	<i>diasemus, glacialis, nigrans</i>

TECOMA radicans	pergandei, vaporariorum
T. velutina	vaporariorum
TILIA americana	mori
TROPAEOLUM sp.	vaporariorum
TROXIMON sp.	spiraeoides
ULMUS scabra var. pendula	packardi
UMBELLULARIA californica	{ errans, inconspicua, irides- cens, nigra
VACCINIUM sp.	plumosa
V. uliginosum	vaccinii
VERBENA sp.	VAPORARIORUM
VIBURNUM nudum	citri, plumosa
V. opulus	pergandei
V. tinus	jelinekii
VICIA faba	vaporariorum
ZANTHOXYLUM american-	
um	pergandei
ZINNIA sp.	vaporariorum

I do not know the scientific names of the following plants:

CHAPARRAL	{ In Spanish = ever green Oak	} vittata
ESCABILLO		tracheifer
"GRASS"		fumipennis, graminicola, sac- chari
JICACO		
"MYRTACEOUS plant"	(Aleyrodicus)	cockerellii
PALO DE GUSANO	{ Spanish 'Worm- wood'	} altissima
